___ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to ___ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed Medical Doctor with a specialty and board certification in Physical Medicine and Rehabilitation. The reviewer is on the TWCC Approved Doctor List (ADL). The ___ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

CLINICAL HISTORY

___ sustained an industrial injury to his low back on ___. He was 43 years of age, with illustrated lumbar degenerative disc disease with some radiculopathy. The patient was status post-lumbar discectomy prior to this injury.

An April 2002 MRI revealed postoperative granulation tissue. He had later lumbar discography, reproducing pain at L5/S1, and later had lumbar fusion surgery. There was apparently a residual ongoing pain component afterward. Later the patient had a myelogram fro continuing low back and right extremity pain. He has had use of the interferential stimulator for a few month this year, with some temporary palliative relief during the hours of use.

REQUESTED SERVICE

The purchase of an RS-4i interferential and muscle stimulator is requested for this patient.

DECISION

The reviewer agrees with the prior adverse determination.

BASIS FOR THE DECISION

The reviewer does not find that the purchase of the requested stimulator is justified. There is not

sufficient evidence in the literature providing this modality has a lasting/more than temporary effect on chronic pain. The reputable reported literature and the practice experiences in medicine continue to strongly suggest other alternative modalities can give equal/similar temporary pain amelioration.

___ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. ___ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of ___, I certify that there is no known conflict between the reviewer, ___ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

___ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,
