NOTICE OF INDEPENDENT REVIEW DECISION

January 15, 2005

Re: IRO Case # M2-05-0521-01

Texas Worker's Compensation Commission:

Envoy Medical Systems, LP (Envoy) has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to Envoy for an independent review. Envoy has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, Envoy received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to Envoy for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the Envoy reviewer who reviewed this case, based on the medical records provided, is as follows:

<u>Medical Information Reviewed</u>

1. Table of disputed services
2. Denial letters
3. RME report Dr. Raulston 8/9/04
4. Report Dr. Lamarre 9/28/04
5. Report Dr. Houghton 9/28/04
6. Chronic pain management evaluation 7/6/04
7. RME report Dr. Small 6/21/04

8. Impairment Rating Dr. Harris 10/27/04
9. DDE Dr. Strain 11/25/03
10. Records from Dr. Harris
11. Psychosocial screening report 1/19/04

History
The patient is a 29-year-old female who fell in ___ and developed lower back pain that persists. There is radiation into the right knee. Epidural steroid injections provided only transient relief. Chiropractic care was provided.

Requested Service(s)
Chronic pain management program x 25 days

Decision
I agree with the carrier's decision to deny the requested pain management program

Rationale
There is clinical indication from several examiners that SI joint dysfunction is present. Based on the records provided for this review, an SI belt, and possibly SI joint injections would be indicated. Extensive chiropractic care has been provided. It would not be necessary to repeat the chiropractic / physical therapy care with a pain management program. The patient's depression could be addressed with an antidepressant medical regime. The records do not show an indication for an extensive pain management program.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
