## **BACKGROUND AND OVERVIEW**

Article VIII, Rider 12, of the 2010 – 2011 General Appropriations Act (Rider 12) required the Texas Department of Insurance to prepare a Consumer Information Report that contains the following information for each insurer that writes a line of insurance in Texas: market share, profits and losses, average rate, average loss ratio, and change in rate over the previous 12, 24, and 36 months. This report covers data collected under the requirements of this rider for the third and fourth quarters of 2010, as well as the first and second quarters of 2011. Companies writing property and casualty products have reported quarterly financial data for several years pursuant to statutory mandate. This is the first report of this type in Texas for companies writing accident and health, life, credit, and annuity products.

To collect the required data, TDI distributed a data call to all insurance companies licensed to write life, accident and health, long-term care, Medicare supplement, credit, and annuities in Texas, as well as all licensed health maintenance organizations in Texas. TDI instructed each responding company to submit data for each line of coverage for which the company had direct written premium in Texas during the applicable reporting period. TDI further instructed respondents to value this business as of the last day of the reporting period.

TDI conducted the initial data call in November 2010 to capture a snapshot of the third quarter 2010 experience (July 1, 2010 – September 30, 2010). Subsequently, TDI requested and received significant input from insurance company and insurance association representatives regarding ways to improve the data call and enhance the timeliness and accuracy of companies' responses. TDI incorporated many of these suggestions into the fourth quarter 2010 data call, the most significant of which was to revise the reporting period to capture calendar year-to-date experience rather than a quarterly snapshot. Therefore, while the third quarter 2010 data call captured financial results for July through September only, the fourth quarter 2010 data call captured cumulative calendar year 2010 financial results, including data for the first, second, and third quarters of 2010. This modification resulted in a more encompassing view of the insurance market, as companies can experience significant fluctuations in their quarterly financial results due to the cyclical nature of quarterly reporting. Both quarters of 2011 use the same revised format as the fourth quarter of 2010. After considerable review and correspondence with the companies to obtain the best data possible, TDI produced tables to display the results of the data call.

The following are considerations of the data included in the report:

- Average annual premium per life figures do not necessarily represent the typical premium a consumer would pay since it is an average of different plans with varying deductibles, coinsurance, copayments, and benefits.
- The pure direct loss ratio provided on the financial tables is the raw claims to premiums ratio, which is not comparable to the Medical Loss Ratio under federal health reform.
- The Texas Legislature did not continue the data collection requirements of Rider 12 the following legislative session, so TDI was no longer required to collect this data after the second quarter of 2011.

- Profits and losses shown are estimates based on premiums, claims incurred, expenses, investment results, anticipated future claims costs (or benefit payments), taxes (including federal income taxes), and write-offs. These items were reported net of reinsurance. Companies determined allocations to derive Texas net income or loss.

## DATA CALL

The third quarter of 2010 was the first quarter for which TDI collected data. The second quarter of 2011 was the last quarter for which TDI collected data. Over 1,200 companies either responded to the survey or claimed exemption from the survey, indicating that they had no Texas business in force for any of the lines of coverage captured by the data call. The table below shows how companies responded to the 2010 – 2011 quarterly data calls:

	2010 Q3	2010 Q4	2011 Q1	2011 Q2
<b>Companies reporting Texas experience</b>	597	610	601	597
<b>Companies responding but reporting no Texas experience</b>	288	131	119	105
<b>Companies responding as exempt</b>	382	520	519	553

TDI's review of the data received from the companies included identifying inconsistent data, distributing preliminary reports to responding companies to give them the opportunity to review and make corrections when appropriate, and conducting conference calls with companies to request clarification on specific issues. TDI revised the reporting form for data calls for the fourth and subsequent quarters to address issues identified through discussions with the companies, including collecting data on a cumulative year-to-date basis, as well as changing the way that companies reported net profits and losses.

TDI compared responses to similar financial data submitted by companies to the National Association of Insurance Commissioners. TDI identified companies with material discrepancies and contacted those companies for additional data review.

TDI also contacted companies after the first and second quarter data calls of 2011 to address inconsistencies in data. Many companies revised their 2011 data, and some companies made additional revisions to their data for the fourth quarter 2010.

## REPORT LIMITATIONS

TDI worked with respondent companies to address their inquiries and clarify questions in order to ensure that data collection requirements were understood. TDI also revised several data elements and definitions between the third and fourth quarter data calls based on input received. The revisions made limit the degree to which the data in the third quarter of 2010 can be

compared to data from subsequent quarters. Since the results of the fourth quarter 2010 data call include cumulative year-to-date data for 2010, the tables for the fourth quarter 2010 should be considered the primary source of data for calendar year 2010.

This report is assembled from data submitted directly to TDI and certified by the responding companies. While numerous data issues were identified and corrected through quality control procedures, it is possible that some data issues remain.

The Texas Legislature did not continue the data collection requirements of Rider 12 during the following legislative session. As such, TDI was no longer required to collect this data after the second quarter of 2011. Therefore, this report is limited in scope to data collected for the third and fourth quarters of 2010 and the first and second quarters of 2011. Since TDI only collected 12 months worth of data, providing change in rates for 24 and 36 months, as stipulated by Rider 12, was not possible.

## **OVERVIEW OF TABLES**

This report displays results in two types of tables:

- financial tables: rank companies by premium volume
- profit and loss tables: list companies in alphabetical order.

Each reporting quarter contains nine financial tables representing the nine categories of coverage collected by the data call.

Table 1 – Shows data for primary health care services, which includes comprehensive health coverage in the group and individual market.

Table 2 – Shows data for supplemental or added benefits, such as vision, dental, or behavioral health.

Table 3 – Shows data for specific health services such as basic hospital expense, specified disease, specified accident, disability income protection, and other similar specific health coverage.

Table 4 – Shows data for government plans Medicaid, Medicare, and Children’s Health Insurance Program.

Table 5 – Shows group and individual long-term care coverage.

Table 6 – Shows individual Medicare supplement coverage.

Table 7 – Shows group and individual life coverage.

Table 8 – Shows credit life and credit accident and health coverage.

Table 9 – Shows group and individual annuities.

## **Financial Tables**

The financial tables display the top 25 companies by premium volume. In cases where the top 25 companies did not account for at least 90 percent of the market, additional companies were included as necessary for the table to cover at least 90 percent of the market. Third quarter tables reflect premium data collected during the third quarter only. For the fourth quarter of 2010 and the first and second quarters of 2011, premiums are reported as the year-to-date cumulative.

TDI calculated average annual premium amounts for most tables. However, not every table includes an average annual premium column, as premium amounts for some categories can vary widely by the number of options available for each product, as well as by the level of coverage purchased. In these cases, an average premium amount for these coverage types would be nearly meaningless for comparison. For example, premiums for life insurance policies can vary by the age of the insured, the type of policy, and the premium payment options (e.g., single premium, annual, quarterly, or monthly). Some policies also include additional factors, such as dependent life riders, which further complicate determining a comparable average annual premium amount. There are many options for credit coverage and annuities as well. TDI did not collect average annual premium information for life insurance, credit insurance, and annuities.

The premium figures shown are often not directly comparable from one company to another because some companies sell more of one product within the category, with variations from company to company. Since the average annual premium shown for each company includes the combined premiums of different products, some companies will naturally show a higher or lower average annual premium compared to other companies. For example, within the specific health services tables, average annual premium figures for one company may reflect more hospital confinement policies, while another company's figures may reflect more disability policies.

The Pure Direct Loss Ratio is calculated using total claims and total premiums. It is not comparable to the MLR under federal health reform, which considers several additional factors.

## **Profit and Loss Tables**

The profit and loss tables list estimated profit or loss by coverage category. Similar data was not collected for the third quarter of 2010. The data shows the net result of all revenues, claims incurred, expenses, investment results, anticipated future claims costs (or benefit payments), taxes (including federal income taxes), and write-offs. These items are reported net of reinsurance. Companies were instructed to use a logical allocation base to derive Texas net income or loss if Texas data were not already calculated separately. Each company determined the most logical allocation base. If a company did not offer any products in a particular category, then "N/A" appears for that category.

## THIRD QUARTER 2010

### Third Quarter 2010 Financial Tables

Financial Table 1 – Primary Health Care Services Third Quarter 2010 Experience (7/1/10 – 9/30/10)					
Rank	Company	Market Share	Direct Premiums Written	Average Annual Premium Per Life	Pure Direct Loss Ratio†

-	<b>All Companies Reporting Experience</b>	<b>100.0%</b>	<b>\$50,996,937</b>	<b>43.6%</b>

\* The market share for the top 25 companies exceeds 100 percent because some companies reported negative premium for credit coverage. An example of negative premium is a portion of prepaid premium refunded to the consumer.

† Pure direct loss ratio is the ratio of direct claims to direct premiums during the reporting period and is not a reflection of MLR under federal health reform.
