See Illustration 3 in PART XII for an example of reporting a policy with split modifications.

For risks not subject to experience modification, leave this line blank.

8. TOTAL MODIFIED PREMIUM
Report the total adjusted policy premium resulting from the application of an experience rating plan (the product of lines AxB).

For risks not subject to experience modification, leave this line blank.

9. PREMIUM NOT SUBJECT TO EXPERIENCE MODIFICATION-LINES D, E, F, & G
Report the statistical codes, exposures, rates, and corresponding premium for those statistical codes not subject to experience modification. Refer to PART X, for those statistical codes not subject to experience modification.

10. MINIMUM PREMIUMS
The determination of whether or not a risk falls under the minimum premium criteria is made by comparing the premium obtained by extension of payroll plus the expense and loss constants to the highest minimum premium shown on the state rate pages for the classes on the policy. When the premium plus expense constant and loss constant, if any, is less than the minimum premium, then the minimum premium must be charged. When a minimum premium is charged for a policy, the additional premium required to bring the total risk standard premium up to the minimum premium shall be assigned to statistical code 0990. The amount reported under 0990 should NOT include loss, and expense constants. They are reported separately on the Unit Statistical Report.

If the minimum premium applies to a multistate policy, the additional premium required to bring the total risk standard premium up to the minimum premium shall be allocated to the state with the highest minimum premium shown in the rate pages for the states and classes on the policy.

11. LOSS CONSTANT
The loss constant, if any, shall be reported with special classification code 0032.

12. RISK TOTALS--STANDARD
Report the sum of the exposure and premium above this line. The total shall be the premium charged for the policy EXCLUDING the expense constant and premium discounts.
TEXAS WORKERS' COMPENSATION STATISTICAL PLAN

Effective May 6, 2006

EXPOSURE AND PREMIUM

In the event that more than one unit card is necessary, report the totals on the last card only.

13. RISK TOTALS OTHER (EXPOSURE ONLY)
Report the total exposure other than payroll.

In the event that more than one unit card is necessary, report the totals on the last card only.

14. PREMIUM DISCOUNT
The premium adjustment resulting from the application of the Texas premium discount plan shall be reported under statistical code 0063. This premium credit shall not be included in the standard premium.

15. EXPENSE CONSTANT
The premium adjustment resulting from the application of the Texas expense constant shall be reported with statistical Code 0900 (Texas Revised Program). The expense constant on multistate policies shall be allocated to the state with the highest expense constant applicable. In the event that two or more states included on the policy have the same highest expense constant, the expense constant is to be allocated to the state developing the highest standard premium of the states with the highest expense constant.

16. TERRORISM PREMIUM
The premium, if any associated with the implementation of the Terrorism Insurance Act of 2002 shall be reported under statistical code 9740. Terrorism premium is excluded from determination of the standard premium, does not apply to Code 0913 or Code 0923, which are codes for Domestic Workers – Residences and is not subject to the premium incentive for small employers.

17. CERTIFIED WORKERS' COMPENSATION HEALTH CARE NETWORK PREMIUM CREDITS
The premium credit for a policyholder that elects to provide workers’ compensation health care services to injured employees through a certified workers’ compensation health care network shall be reported under statistical code 9874. This premium credit is not subject to experience modification.
