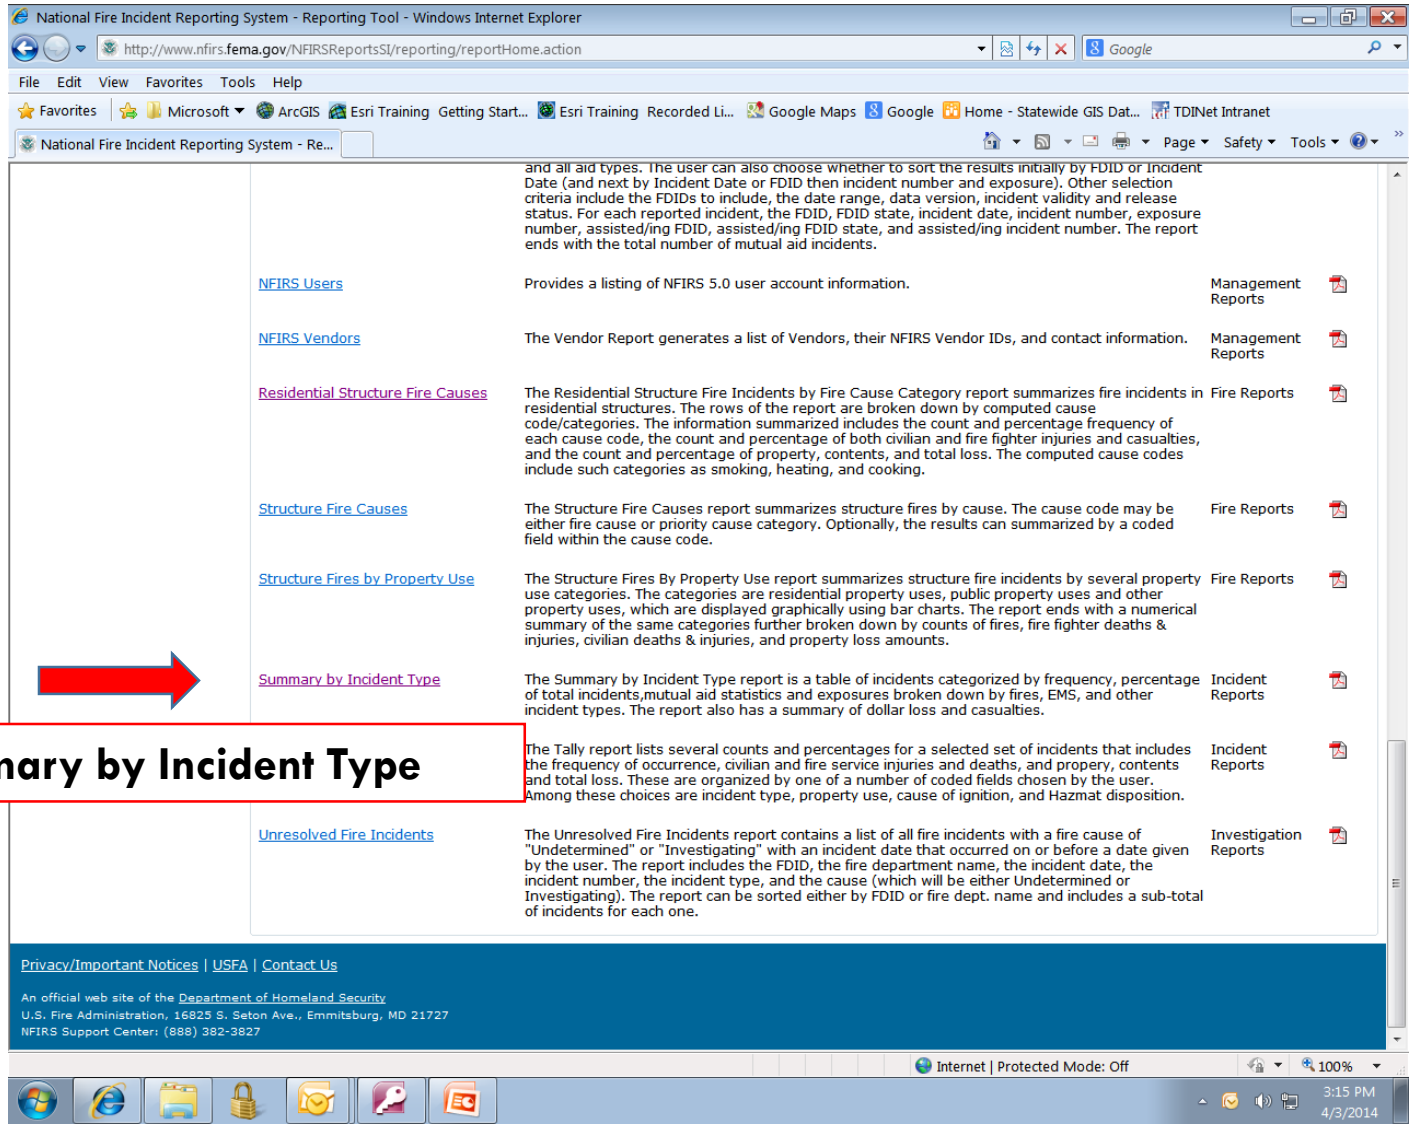
Summary by Incident Type Report



Summary by Incident Type

Summary By Incident Type Report

The report provides a summary of NFIRS incidents

- Categorized by frequency, percentage of total incidents, mutual aid statistics and exposures broken down by fires, EMS, and other incident types.

And, provides summary information on casualties, and the total dollar loss for fire incidents.

- **Note:** No Activity incidents (N status) are not included in any frequency count.

Enhanced Reports

1. Refine Reports Using Coded Fields

2. Ad Hoc Reports Using Additional Filter Parameters

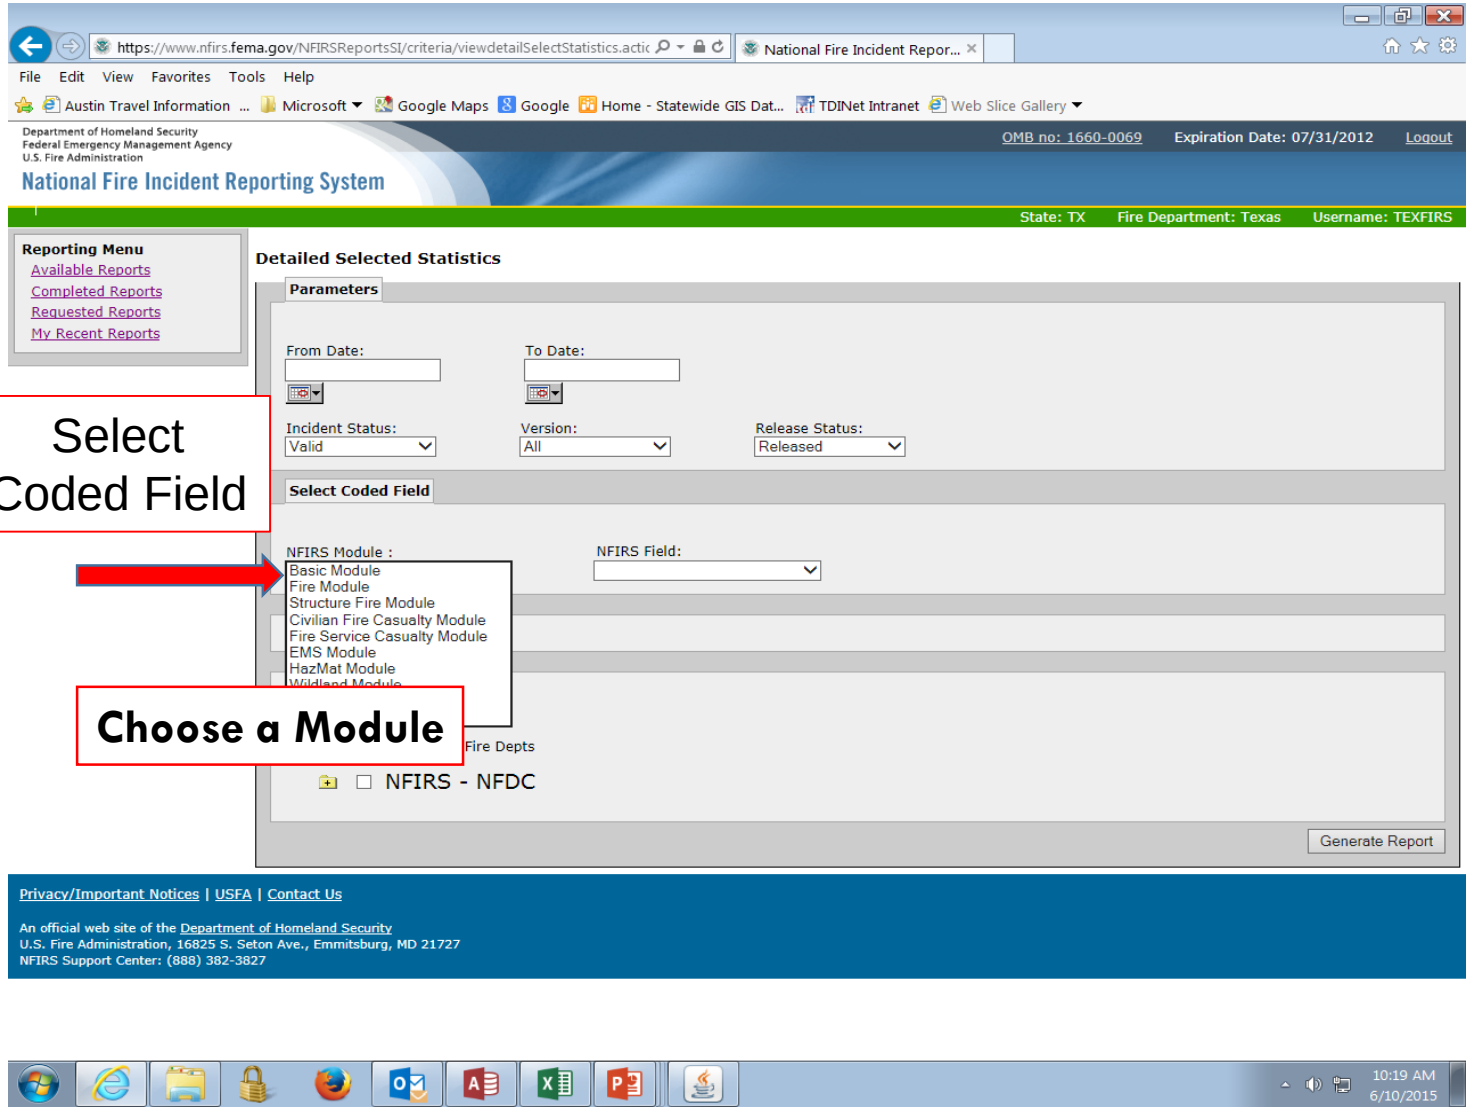
Refined Reports

The Coded Field will be used to group the output of the report (Incidents will be summarized at the level of the selected Coded Field).

A pair of drop-down list boxes provide the user with the capability to select a Coded Field for the report.

- The first list box contains the various NFIRS 5.0 modules.
- A selection of a module from this list box will re-populate the list box on the right with the Coded Fields available for the selected NFIRS 5.0 Module.

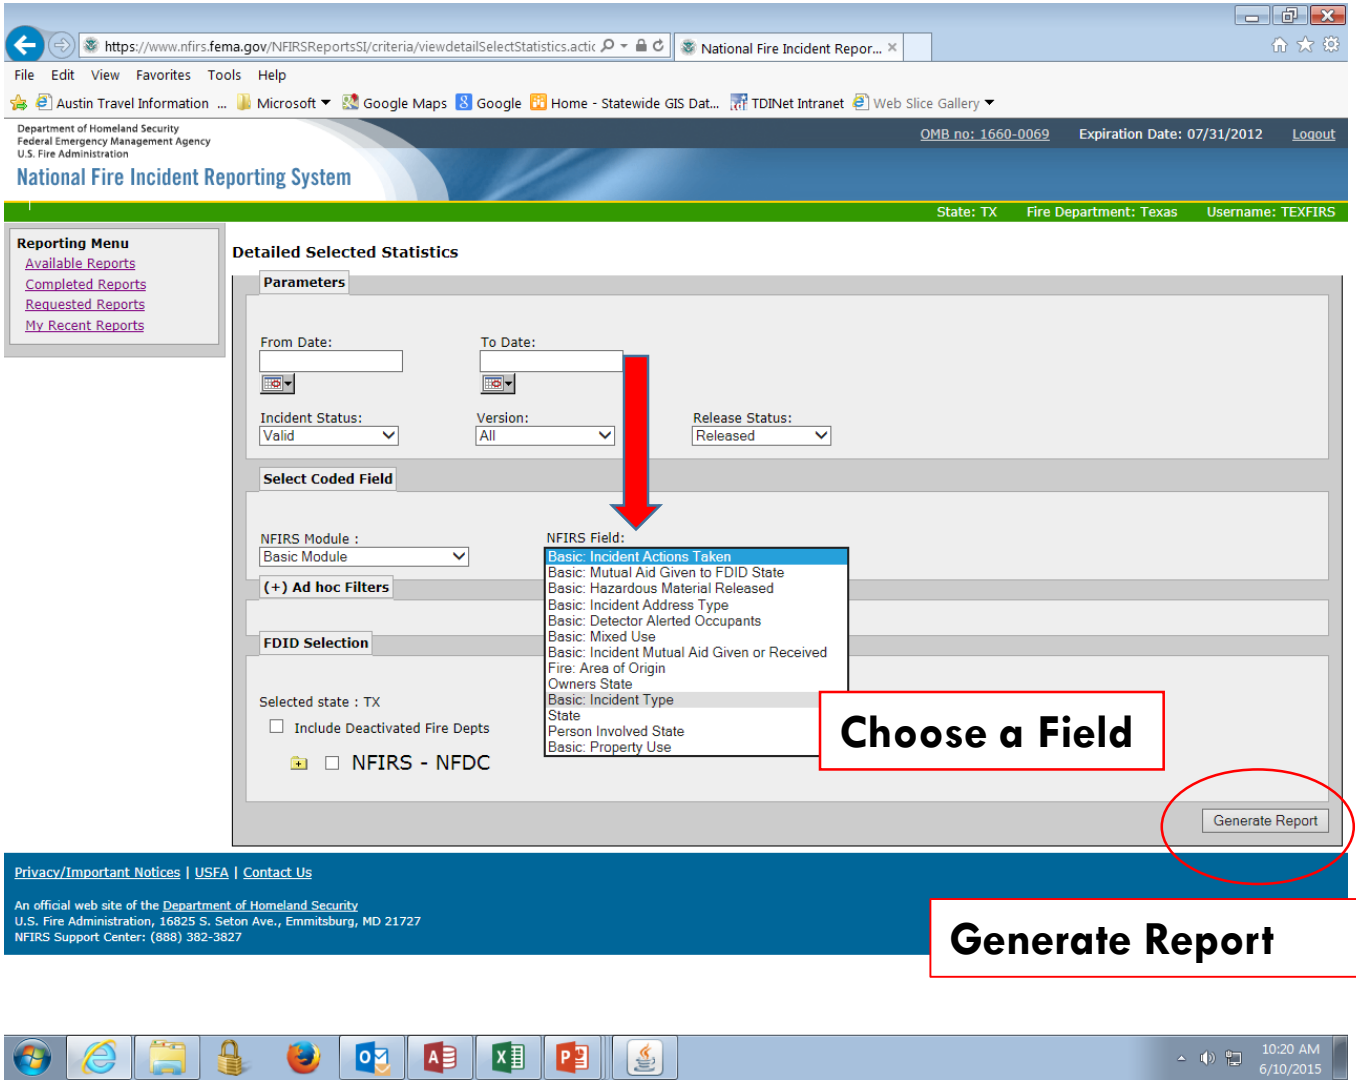
Select Coded Field



Select Coded Field

Choose a Module

Select Coded Field



Ad hoc Filters

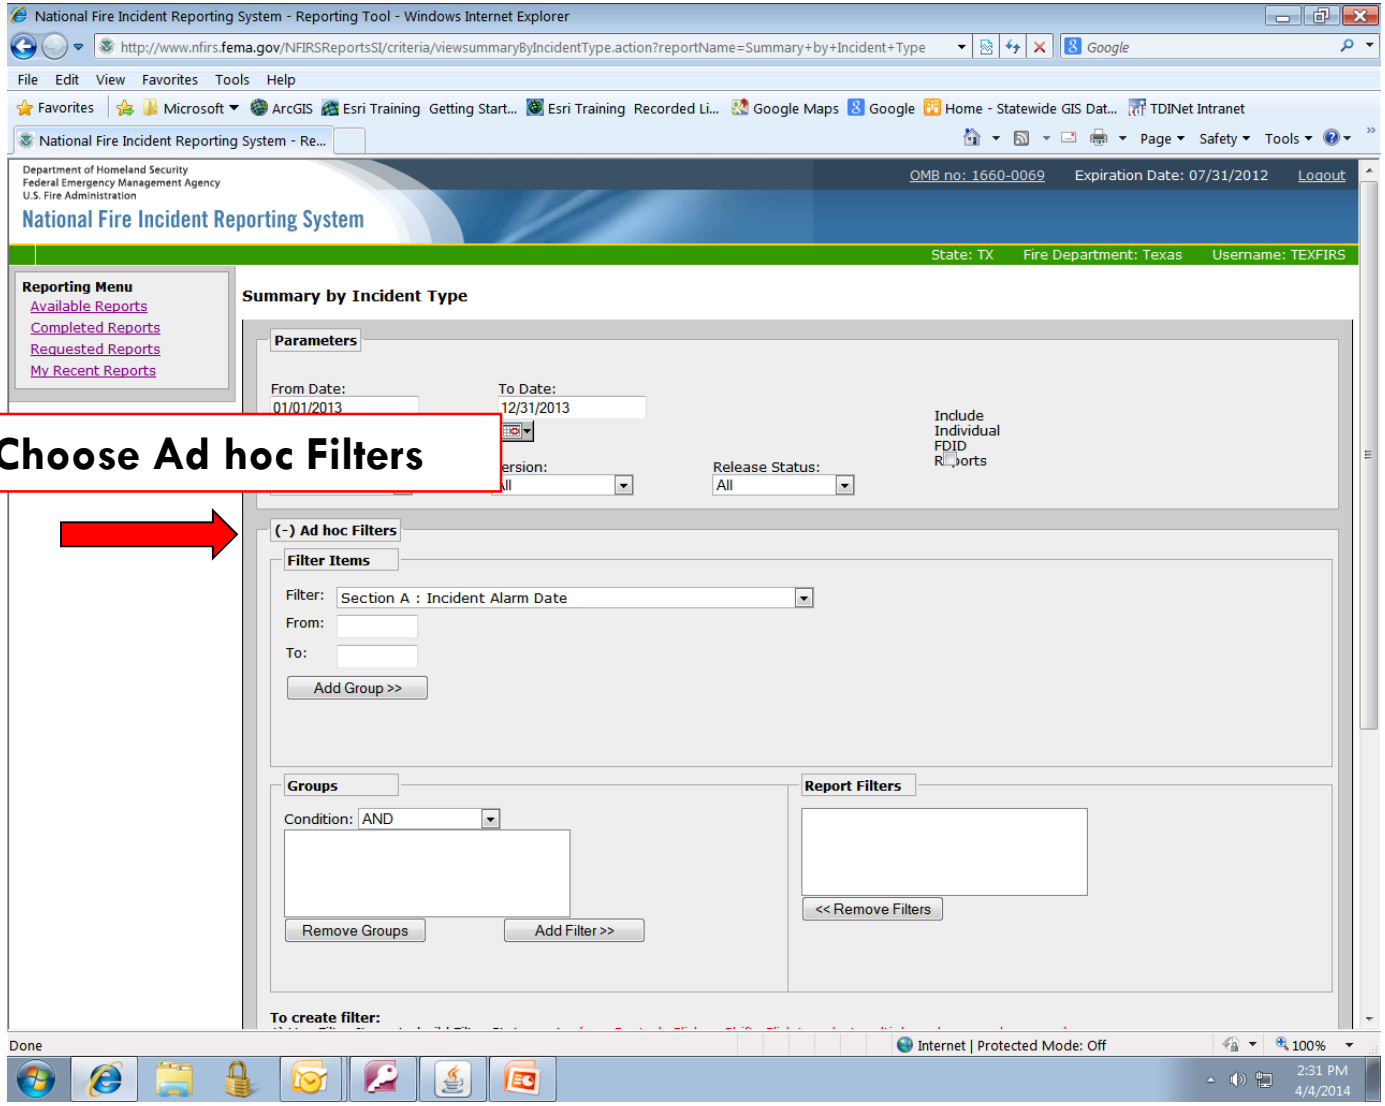
Enable the user to create additional filter parameters that will further limit the incidents that are retrieved for the report.

- The user may select from a list of available coded fields for filtering the incident content of the report.
- Incidents that match each filter's range will be included in the calculations for the report.
- May be available in combination with the Select Code Field option or may be a choice by itself, depends on the report.

For available codes see the NFIRS 5.0 Complete Reference Guide

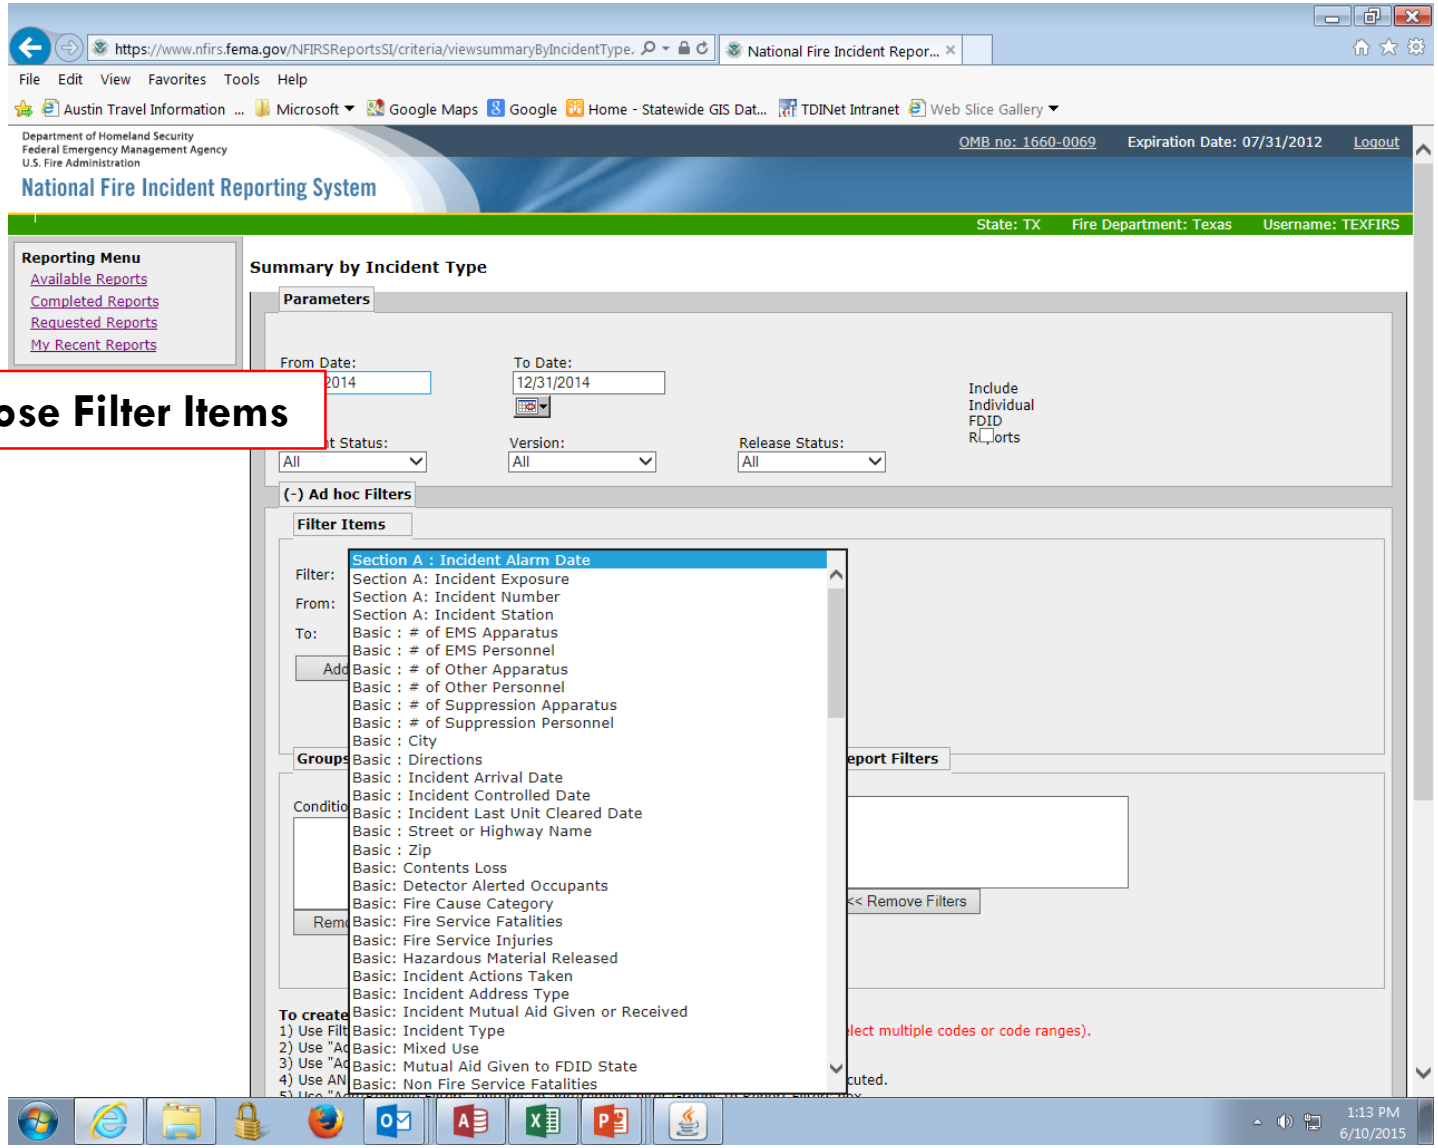
http://www.nfirs.fema.gov/documentation/reference

Ad hoc Filters

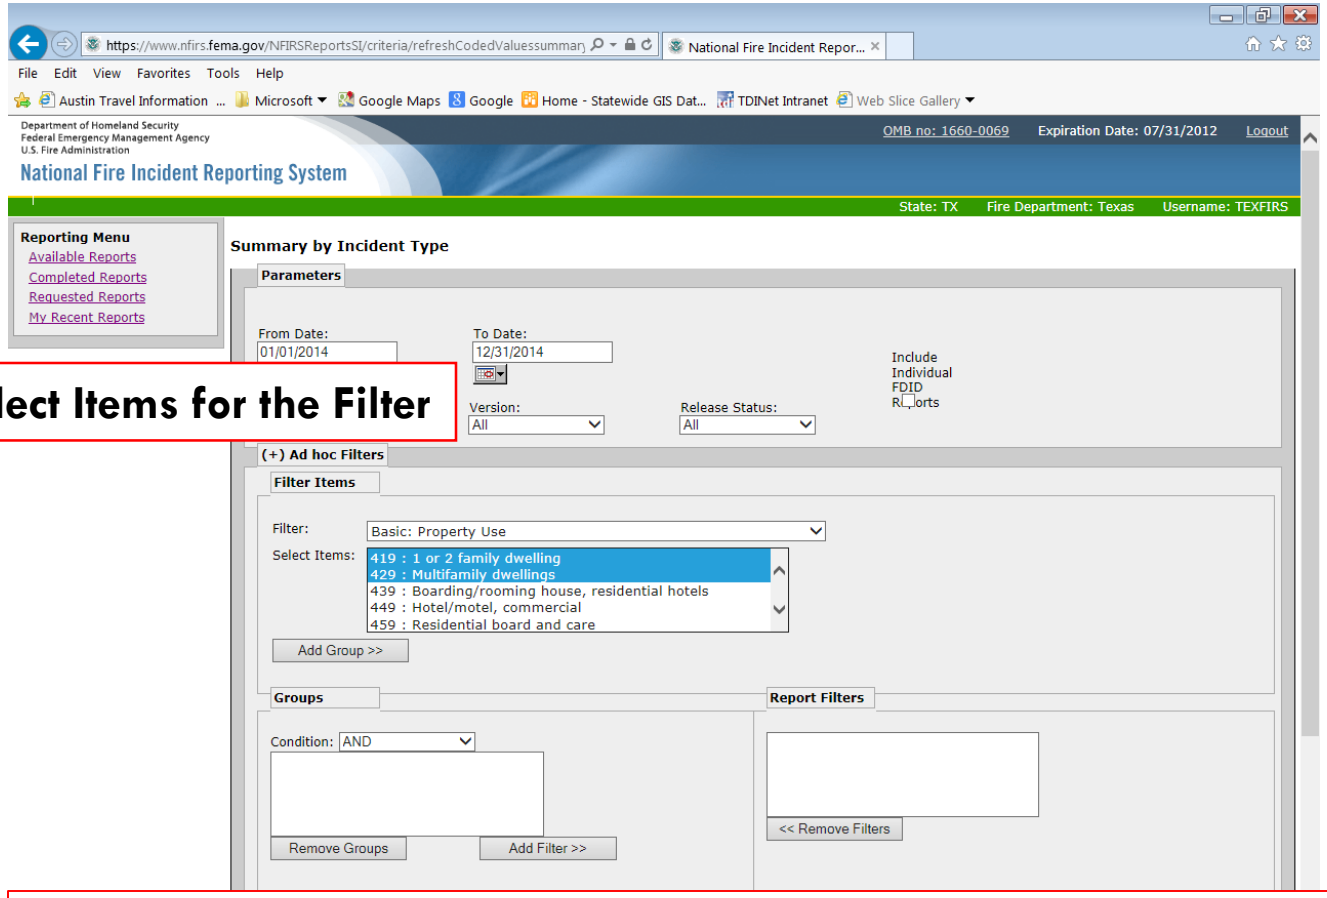


Choose Ad hoc Filters

Filter Items by Section



Filter Items



Select Items for the Filter

- Select Filter Items. (Hold the Shift or Ctrl key down to choose multiple items.)
- Add to your Group
- Choose the Condition (And / Or) for items in Group
- Complete the Group and Add to your Report Filter
