AMENDED IRO NOTICE OF DECISION - WC

Corrected Table of the Review Outcome for Health Care Services in Dispute

August 22, 2007

August 17, 2007

DATE OF REVIEW: 08-03-2007

IRO CASE #:

DESCRIPTION OF THE SERVICE OR SERVICES IN DISPUTE

Physical Therapy 3 x 4 Weeks for 12 sessions

A DESCRIPTION OF THE QUALIFICATIONS FOR EACH PHYSICIAN OR OTHER HEALTH CARE PROVIDER WHO REVIEWED THE DECISION

Certified by The Physical Medicine & Rehabilitation
General Certificate in Physical Medicine & Rehabilitation

REVIEW OUTCOME

Upon independent review the reviewer finds that the previous adverse determination/adverse determinations should be:

- Upheld (Agree)
- Overturned (Disagree)
- Partially Overturned (Agree in part/Disagree in part)

Injury Date	Claim #	Review Type	ICD-9 DSMV	Service Units	Upheld/ Overturn
		Prospective	844.9	4	Overturn
		Prospective	844.9	8	Upheld

INFORMATION PROVIDED TO THE IRO FOR REVIEW

Non-Authorization Notice 05-10-07, 06-11-07,
Revised Notice 07-10-07
Patient Face Sheet / Case Information
Physical Therapy Pre-Authorization Request 05-07-07
Consultation Report 04-27-07, 05-24-07
Initial Behavioral Medicine Consultation 05-08-07
Initial Evaluation 05-01-07

PATIENT CLINICAL HISTORY:

This xx-year-old patient sustained injury on his left knee on xx/xx/xx. X-ray of left knee revealed mild medial joint space narrowing, no evidence of fracture or joint effusion. On 04-27-07 consultation visit, the physician noted slight effusion in the superior portion of the left patella, decrease ROM and difficulty with ambulation. Impression was left knee strain and the treatment plan was for a knee brace and physical therapy.

ANALYSIS AND EXPLANATION OF THE DECISION INCLUDING CLINICAL BASIS, FINDINGS AND CONCLUSIONS USED TO SUPPORT THE DECISION

In the professional opinion of the Reviewer, the patient is a candidate for four visits of Physical Therapy (three for actual Physical Therapy, with one for teaching an independent Home Exercise Program), as this would constitute a reasonable course of conservative management. The patient has x-ray evidence of joint space narrowing and given his age and mechanism of injury to deny physical therapy completely minimizes the patient a chance for improvement.

In addition, the patient's anxiety and depression over not being able to work can be classified as reactive.

Physician physical examination dated 4-27-07 noted a slight effusion in the superior portion of the left patella. The patient also had difficulty with stooping and kneeling.

Physician physical examination dated 05-24-07 demonstrated resolution of effusion. The patient continued to wear a knee brace and had pain improvement on Motrin.

The patient was diagnosed with left knee strain 844.9.

Literature Cited:

ODG Guidelines for ICD diagnoses 844 states that if there is no improvement after 2-3 weeks the protocol may be modified.

A review of the medical literature including Arthritis Rheumatology and recommendations from the Academy of Sports Medicine and American Academy

of Orthopedic Surgery support conservative treatment including physical therapy in early case of knee sprain.

Lumetra's Physician Reviewer has no known conflicts of interest in this case, pursuant to the Insurance Code Article 21.58A (Chapter 4201 effective April 1, 2007), Labor Code § 413.032, and § 12.203 of this title.
