FINDINGS AND DECISION

This medical fee dispute is decided pursuant to Texas Labor Code §413.031 and applicable rules of the Texas Department of Insurance, Division of Workers' Compensation.

Background

- 28 Texas Administrative Code §133.307 sets out the procedures for resolving medical fee disputes.
- 28 Texas Administrative Code §134.403 sets out the reimbursement guidelines for outpatient hospital services.
- 28 Texas Administrative Code §134.600 sets out the requirements for prior authorization.
- 28 Texas Administrative Code §134.203 sets out the reimbursement guidelines for professional medical services.
- The insurance carrier reduced payment for the disputed services with the following claim adjustment

codes:

- P12 – Workers’ compensation jurisdictional fee schedule adjustment
- 356 – This outpatient allowance was based on the Medicare’s methodology (Part B) plus the Texas markup
- 197 – Precertification/authorization/notification/pre-treatment absent

Issues

1. Is the carrier’s denial/reduction of payment supported?
2. Is the requestor entitled to additional reimbursement?

Findings

1. The requestor is seeking additional reimbursement for outpatient therapy services performed in December 2019. The carrier denied the date of service on December 2, 2019 and reduced the allowed amount of remaining dates of service based on the workers compensation fee schedule and multiple procedure payment rules.

Review of the submitted documentation found insufficient evidence to support prior authorization of the services rendered December 2, 2019 as required by 134.600 (p)(5) which does require prior authorization of physical therapy services. The insurance carrier’s denial is supported.

28 TAC 134.403 applies to outpatient hospital services. Section (h) requires when Medicare reimburses using other Medicare fee schedules, reimbursement is made using the applicable Division Fee Guideline in effect for that service on the date was provided.

The applicable DWC fee guideline for physical therapy is 28 TAC §134.203 (b) (1) requires the application of Medicare payment policies applicable to professional services. The insurance carrier’s reduction of payment is supported.

The Medicare multiple procedure payment reduction (MPPR) applies to the Practice Expense (PE) of certain time-based physical therapy codes when more than one unit or procedure is provided to the same patient on the same day.

The MPPR policy allows for full payment for the unit or procedure with the highest Practice Expense (PE) payment factor and for subsequent units the Practice Expense (PE) payment factor is reduced by 50 percent.

Review of the submitted medical bill provided indicates that three procedures were billed by the health care provider. In order to determine the MPPR allowable, the services provided are ranked by their PE expense shown below.

Code	Practice Expense	Allowed Amount	Medicare Policy
97110	0.4	\$23.55	MPPR applies
97140	0.35	\$21.70	MPPR applies
97112	0.47	\$34.48/\$26.54	No MPPR for dates of service December 4, 2019. MPPR applies for Dates of service December 5 – 30, 2019
97530	0.67	\$39.08	Date of service December 5– 30, 2019

The MPPR Rate File that contains the payments for 2019 services is found at <https://www.cms.gov/Medicare/Billing/TherapyServices/index.html>.

- MPPR rates are published by carrier and locality.
- The services were provided in Edinburg, Texas.
- The carrier code for Texas is 4412 and the locality code for Edinburg is 99.

The following formula represents the calculation of the DWC MAR at §134.203 (c)(1) & (2).

$$(DWC \text{ Conversion Factor} \div \text{Medicare Conversion Factor}) \times \text{Medicare Payment} = \text{MAR}$$

Applicable 28 TAC 134.203(h) states that the total reimbursement is the lesser of the maximum allowable reimbursement (MAR) and the billed amount.

Date of Service	Code	Units	Medicare Payment	DWC Conversion Factor divided by Medicare Conversion Factor or $59.19 \div 36.0391 = 1.64$	Billed Amount	Lesser of MAR and billed amount
December 4, 2019	97110	2	\$23.55	$\$23.55 \times 1.64 \times 2 = \77.24	\$284.00	\$77.24
