## **Findings and Decision**

### Authority

This medical fee dispute is decided according to [Texas Labor Code §413.031](#) and applicable rules of the Texas Department of Insurance, Division of Workers' Compensation (DWC).

### Statutes and Rules

1. [28 TAC §133.307](#) sets out the procedures for resolving medical fee disputes.
2. [28 TAC §134.203](#) sets out the billing and coding requirements of professional medical bills.

### Denial Reasons

The insurance carrier reduced or denied the disputed service(s) with the following claim adjustment codes.

- 5845 – No significant identifiable evaluation and management service has been documented.
- 876 – Fee schedule amount is equal to the charge.

### Issues

1. Is the insurance carrier's denial supported?

### Findings

1. The requestor is seeking medical fee dispute resolution for professional medical services rendered in May of 2023. The respondent denied reimbursement for CPT code 99205-25 based upon reason codes "5845" description provided above. The fee guidelines for disputed services are found in 28 TAC §134.203.

DWC Rule 28 TAC §134.203(b)(1) states, "For coding, billing, reporting, and reimbursement of professional medical services, Texas workers' compensation system participants shall apply the following:

- (1) Medicare payment policies, including its coding; billing; correct coding initiatives (CCI) edits; modifiers; bonus payments for health professional shortage areas

(HPSAs) and physician scarcity areas (PSAs); and other payment policies in effect on the date a service is provided with any additions or exceptions in the rules.”

The respondent denied reimbursement for CPT code 99205-25 based upon reason code “5845” description provided above. CPT code 99205 is described as

- Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and high level of medical decision making. When using time for code selection, 60-74 minutes of total time is spent on the date of the encounter.

The requestor appended modifier “25” to CPT code 99205. Modifier “25” is defined as “It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (see Evaluation and Management Services Guidelines for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service.”

On the disputed date of service, the requestor billed CPT codes 99205-25, 95886 and 95909. The requestor seeks reimbursement for CPT code 99205-25.

Per 28 TAC §134.203(a)(5), the DWC referred to Medicare’s coding and billing policies. Per Medicare fee schedule, CPT code 95886 has a global surgery period of “ZZZ” and codes 99205 and 95909 have “XXX”.

The National Correct Coding Initiative Policy Manual, effective January 1, 2021, Chapter I, General Correct Coding Policies, section D, states: Medicare Global Surgery Rules define the rules for reporting evaluation and management (E&M) services with procedures covered by these rules. This section summarizes some of the rules.

*“All procedures on the Medicare Physician Fee Schedule are assigned a global period of 000, 010, 090, XXX, YYY, ZZZ, or MMM. The global concept does not apply to XXX procedures...All procedures with a global period of ZZZ are related to another procedure, and the applicable global period for the ZZZ code is determined by the related procedure... Since NCCI PTP edits are applied to same-day services by the same provider to the same beneficiary, certain Global Surgery Rules are applicable to NCCI. An E&M service is separately reportable on the same date of service as a procedure with a global period of 000, 010, or 090 under limited circumstances...*

*If a procedure has a global period of 000 or 010 days, it is defined as a minor surgical procedure. In general, E&M services performed on the same date of service as a minor surgical procedure are included in the payment for the procedure. The decision to perform a minor surgical procedure is included in the payment for the minor surgical procedure, and shall not be reported separately as an E&M service. However, a significant and separately identifiable E&M service unrelated to the decision to perform the minor surgical procedure is separately reportable with*

*modifier 25. The E&M service and minor surgical procedure do not require different diagnoses. If a minor surgical procedure is performed on a new patient, the same rules for reporting E&M services apply. The fact that the patient is "new" to the provider is not sufficient alone to justify reporting an E&M service on the same date of service as a minor surgical procedure. The NCCI program contains many, but not all, possible edits based on these principles... Procedures with a global surgery indicator of "XXX" are not covered by these rules. Many of these "XXX" procedures are performed by physicians and have inherent preprocedure, intra-procedural, and post-procedure work usually performed each time the procedure is completed. This work shall not be reported as a separate E&M code. Other "XXX" procedures are not usually performed by a physician and have no physician work relative value units associated with them.*

*A physician shall not report a separate E&M code with these procedures for the supervision of others performing the procedure or for the interpretation of the procedure. With most "XXX" procedures, the physician may, however, perform a significant and separately identifiable E&M service on the same date of service which may be reported by appending modifier 25 to the E&M code. This E&M service may be related to the same diagnosis necessitating performance of the "XXX" procedure, but cannot include any work inherent in the "XXX" procedure, supervision of others performing the "XXX" procedure, or time for interpreting the result of the "XXX" procedure. Appending modifier 25 to a significant, separately identifiable E&M service when performed on the same date of service as an "XXX" procedure is correct coding."*

*Per Medicare policy, "This E&M service may be related to the same diagnosis necessitating performance of the "XXX" procedure but cannot include any work inherent in the "XXX" procedure, supervision of others performing the "XXX" procedure, or time for interpreting the result of the "XXX" procedure."*

A review of the submitted report does not support the use of the 25 modifier, "a significant, separately identifiable E/M service above and beyond the other service provided," and "documentation that satisfies the relevant criteria for the respective E/M service to be reported" for Code 99205 described above.

The interpretation of the EMG/NCV is the professional component of code 95886 and 95909 and cannot be counted as a key component of code 99205. The insurance carrier's denial is supported.

The DWC finds that the requestor is not entitled to reimbursement for CPT Codes 99205-25 rendered on May 1, 2023.

### Conclusion

The outcome of this medical fee dispute is based on the evidence presented by the requestor and the respondent at the time of adjudication. Though all evidence may not have been discussed, it was considered.

DWC finds the requester has not established that reimbursement is due.

## **Order**

Under Texas Labor Code §§413.031 and 413.019, DWC has determined the requestor is entitled to \$0.00 additional reimbursement for the disputed services.
