Under the provisions of Section 413.031 of the Texas Workers' Compensation Act, Title 5, Subtitle A of the Texas Labor Code, effective June 17, 2001 and Commission Rule 133.305 titled Medical Dispute Resolution - General and 133.308 titled Medical Dispute Resolution by Independent Review Organizations, the Medical Review Division assigned an IRO to conduct a review of the disputed medical necessity issues between the requestor and the respondent. The dispute was received on 1-16-04.

The Medical Review Division has reviewed the IRO decision and determined that **the requestor prevailed** on the issues of medical necessity. Therefore, upon receipt of this Order and in accordance with §133.308(r)(9), the Commission hereby orders the respondent and non-prevailing party to **refund the requestor \$650** for the paid IRO fee. For the purposes of determining compliance with the order, the Commission will add 20 days to the date the order was deemed received as outlined on page one of this order.

In accordance with §413.031(e), it is a defense for the carrier if the carrier timely complies with the IRO decision.

Based on review of the disputed issues within the request, the Medical Review Division has determined that **medical necessity was the only issue** to be resolved. The unlisted procedure (refill and reprogramming of the patient's pump protocol) was found to be medically necessary. The respondent raised no other reasons for denying reimbursement for the above listed service.

On this basis, and pursuant to §§402.042, 413.016, 413.031, and 413.019 of the Act, the Medical Review Division hereby ORDERS the respondent to pay the unpaid medical fees in accordance with the fair and reasonable rate as set forth in Commission Rule 133.1(a)(8) plus all accrued interest due at the time of payment to the requestor within 20 days of receipt of this order. This Order is applicable to date of service 6/13/03 in this dispute.

The respondent is prohibited from asserting additional denial reasons relative to this Decision upon issuing payment to the requestor in accordance with this Order (Rule 133.307(j)(2)).

This Decision and Order is hereby issued this 28th day of April 2004.

An independent review of the above-referenced case has been completed by a medical physician board certified in physical medicine and rehabilitation. The appropriateness of setting and medical necessity of proposed or rendered services is determined by the application of medical screening criteria published by ___ or by the application of medical screening criteria and protocols formally established by practicing physicians. All available clinical information, the medical necessity guidelines and the special circumstances of said case was considered in making the determination.

The independent review determination and reasons for the determination, including the clinical basis for the determination, is as follows:

See Attached Physician Determination

___ hereby certifies that the reviewing physician is on Texas Workers' Compensation Commission Approved Doctor List (ADL). Additionally, said physician has certified that no known conflicts of interest exist between him and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for determination prior to referral to ___.

CLINICAL HISTORY

___, date of birth ___, sustained an injury on ___ to the neck, right shoulder and she had the complaint of lower back pain as well. She had four years of conservative treatment and underwent multi-level cervical fusion on 7/31/01. The patient had a repeat neck surgery, three shoulder surgeries and three lower back surgeries. More after, the patient had chronic lower back pain and had an intra-theal morphine pump placed on 8/23/02.

REQUESTED SERVICE (S)

Unlisted procedure, refill and reprogramming of patients pump protocol.

DECISION

Approve. Reverse prior denial.

RATIONALE/BASIS FOR DECISION

After review of this patient's medical records available, it is medically necessary to electronically analyze a programmable implanted pump for accurate intra-theal medication infusion.
