The findings of the independent review are as follows:

Questions for Review

Ancillary services for DOS 4.15.04; CPT Code 360 is not included in review

Determination

PHMO, Inc. has performed an independent review of the proposed care to determine if the adverse determination was appropriate. After review of all medical records received from both parties involved, the PHMO, Inc. physician reviewer has determined to **uphold the denial**.

Summary of Clinical History

Mr. ___ was involved in a work related accident on ____. He slipped down a flight of stairs injuring his lower back.

Clinical Rationale

After review of the records in detail, I have determined that the various ancillary services were not necessary. Specifically, due to Dr. Omar Vidal's operative note, which made clear that the procedure was done under a local anesthetic by himself. Thus, there was no need for any ancillary anesthesiology service. Additionally, the standard of care after a lumbar epidural steroid injection is merely observation by nursing personnel, and there is no necessity for any specific post anesthesia care unit. The entire procedure should be able to be done with a fluoroscopic aid by the administering physician, and should not require the ancillary services of an anesthesiologist or of any specialized postoperative care other than observation until stable.

Therefore, I once again state that the determination of the URA denial should be upheld
