

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

September 27, 2002

Re: IRO Case # M2-02-0699

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IRO's, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

This patient suffered a repetitive stress injury to his left hand and wrist in ___. His work up has been unrevealing. The diagnosis is "repetitive use trauma" with reactive depression. A psychological evaluation has revealed anxiety, depression, somatization. There has been modest improvement with a 20-day pain management program.

Requested Service

Multidisciplinary Chronic Pain Management Program 10 sessions, eight hours per day.

Decision

I disagree with the carrier's decision to deny the requested treatment.

Rationale

There has been modest improvement in the functional status of the patient, with less depression, decreased SEMG readings, increased range of motion. It is reasonable and necessary to complete the additional ten days of the program with emphasis on a home exercise program and coping skills that will help him

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
