Re: Medical Dispute Resolution
MDR #: M2-03-0228-01
IRO Certificate No.: IRO 5055

Dear

In accordance with the requirement for TWCC to randomly assign cases to IROs, TWCC assigned your case to ___ for an independent review. ___ has performed an independent review of the medical records to determine medical necessity. In performing this review, ___ reviewed relevant medical records, any documents provided by the parties referenced above, and any documentation and written information submitted in support of the dispute.

The independent review was performed by a matched peer with the treating health care provider. Your case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management

I am ___ and I certify that the reviewing physician in this case has certified to our organization that there are no known conflicts of interest that exist between him and any of the treating physicians or other health care providers or any of the physicians or other health care providers who reviewed this case for determination prior to referral to the Independent Review Organization.

We are simultaneously forwarding copies of this report to the payor and the Texas Workers' Compensation Commission. This decision by ___ is deemed to be a Commission decision and order.

Clinical History:

This 53-year-old female claimant injured her back and right knee on her job on ____. She has been treated with conservative care as well as surgically since that time. She had a positive myelogram on 11/29/00 of an L4-5 herniation and degenerative L2-3.

Disputed Services:

Discogram and epidural steroid injections.

Decision:

The reviewer disagrees with the determination of the insurance carrier. The reviewer is of the opinion that the procedures in question are medically necessary in this case.

Rationale for Decision:

This patient has received appropriate pain care and appropriate clinical care up to this point. A discogram of the involved disc and epidural steroid injections are medically necessary and are appropriate next steps in her treatment.
