___ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to ___ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed DO with a specialty and board certification in Neurosurgery. The ___ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

CLINICAL HISTORY

A one-page document for request of the electrical stimulator for lumbar sacral radiculitis was found in the chart.

REQUESTED SERVICE

A BMRNT 2000 neuromuscular electrical stimulator is requested for ___.

DECISION

The reviewer agrees with the prior adverse determination.

BASIS FOR THE DECISION

One page of documentation for request of the electrical stimulator for lumbar sacral radiculitis was found in the chart. It does not supply sufficient documentation. The reviewer has no idea of what has done with this patient, other than she has a pain score of 10.

Because of the lack of adequate documentation, the reviewer finds that the neuromuscular electrical stimulator is not justified at this time. More accurate diagnosis and further documentation of reports of diagnostic testing including x-rays, MRI, CT, EMG and a physical examination statement are needed to justify this item. Until further testing is performed, the reviewer finds the neuromuscular electrical stimulator to be neither necessary nor useful.

As an officer of ____, I certify that there is no known conflict between the reviewer, ____ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

____ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,
