NOTICE OF INDEPENDENT REVIEW DECISION

December 18, 2002

Re: IRO Case # M2-03-0363-01

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesia and Pain Management. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient reportedly suffered an electrical injury ___ with development of pain and swelling in the right upper extremity. There are significant psychological issues present. There have been suicide attempts and a history of drug/alcohol abuse.

Requested Service

Bretylium Bier Blocks x 3

Decision

I disagree in part with the carrier's decision to deny the requested treatment.

Rationale

There are objective signs of CRPS: swelling, mottling. The records indicate that Bier Blocks have provided 2-3 months pain relief. Repeating this procedure is reasonable as a palliative measure. The procedure should be performed one time, followed by reevaluation for efficacy. If no improvement occurs, it would not be reasonable to repeat the procedure.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
