

**IRO Certificate #4599**

**NOTICE OF INDEPENDENT REVIEW DECISION**

March 31, 2003

**Re: IRO Case # M2-03-0703**

Texas Worker's Compensation Commission:

\_\_\_ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to \_\_\_ for an independent review. \_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, \_\_\_ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to \_\_\_ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the \_\_\_ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient has had chronic back / leg pain since a \_\_\_ injury. She has been treated with surgery, injections and physical therapy. The treating physician notes on 11/14/02 that the patient is a surgical candidate.

Requested Service

Pain Management Program

Decision

I agree with the carrier's decision to deny the requested treatment.

Rationale

The documentation presented for this review is inadequate to justify a pain management program. Additional data should be presented including results of myelographic and EMG evaluation as well as notes from the surgical evaluation of the patient. Also, before considering a pain management program for this patient, who also suffers from depression, aggressive antidepressant therapy should be utilized.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
