## NOTICE OF INDEPENDENT REVIEW DECISION

**RE: MDR Tracking #: M2-03-0822-01**

\_\_\_ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). \_\_\_' IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to \_\_\_ for independent review in accordance with this Rule.

\_\_\_ has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the \_\_\_ external review panel. This physician is a board certified neurosurgeon. The \_\_\_ physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to \_\_\_ for independent review. In addition, the \_\_\_ physician reviewer certified that the review was performed without bias for or against any party in this case.

### Clinical History

This case concerns a 47 year-old male who sustained a work related injury on \_\_\_. The patient reported that while at work he was moving a large container containing scrap auto parts when he suffered a severe low back injury. This patient underwent a 360-degree lumbar fusion in 1993. The patient then underwent a posterior hardware removal, fusion exploration and revision laminectomy at L4-L5 and L5-S1. The patient reported that he is in constant pain since the injury and has undergone electroceutical nerve blocks with some relief. The patient sustained an exacerbation in February of 2003 and underwent a CT scan that revealed L1-L2 and L2-L3 intervertebral disc bulges with associated left paramedian disc herniation. The patient is currently taking oral pain medications.

### Requested Services

Purchase of Orthotrac Pneumatic Vest.

### Decision

The Carrier's denial of authorization for the requested services is upheld.

### Rationale/Basis for Decision

The \_\_\_ physician reviewer noted that this patient sustained a work related injury on \_\_\_. The \_\_\_ physician reviewer also noted that the Orthotrac Pneumatic Vest was requested for

treatment of this patient's condition. The \_\_\_ physician reviewer explained that the documentation provided did not support an indication for the Orthotrac Pneumatic Vest. The \_\_\_ physician reviewer also explained that the efficacy of this product has not been proven. The \_\_\_ physician reviewer further explained that there is no evidence supporting the use of the Orthotrac Pneumatic Vest. Therefore, the \_\_\_ physician consultant concluded that the purchase of Orthotrac Pneumatic Vest is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
