___ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to ___ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed D.O. with a specialty and board certification in Neurological Surgery. The ___ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

CLINICAL HISTORY

___ is a woman who sustained a work-related injury dating back to ___. She had neck and low back pain and also had been complaining of numbness into the lower extremities. She has had a series of pain management procedures. An MRI dated 4/26/02 was determined to be a negative study with no evidence of any disc herniations or disc changes. No degenerative disc changes or disc space narrowing was noted. To further evaluate her, a lumbar discogram at all five lumbar levels to be followed by a CT scan is requested.

REQUESTED SERVICE

A lumbar discogram with CT scan is requested for this patient.

DECISION

The reviewer agrees with the prior adverse determination.

BASIS FOR THE DECISION

Numerous studies reported in the literature, including the role of discography with normal MRIs have been debated. Most of the literature suggests that if the MRIs are normal, the discography is of no use. These would include studies by Gill and Blumenthal as well as Greenspan and Silberstein. There is also an accompanying paper from the North American Spine Society, "Current Contemporary Concepts in Spine Care," that reviews discography in detail, and it is a good study to suggest that this proposal be denied.

___ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. ___ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of ___, I certify that there is no known conflict between the reviewer, ___ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

___ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,

YOUR RIGHT TO REQUEST A HEARING

Either party to this medical dispute may disagree with all or part of the decision and has a right to request a hearing.

In the case of prospective *spinal surgery* decision, a request for a hearing must be made in writing and it must be received by the TWCC Chief Clerk of Proceedings within 10 days of your receipt of this decision. (20 Tex. Admin. Code 142.5(c)).
