

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

August 25, 2003

Re: IRO Case # M2-03-1433

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 41-year-old male who has had back and leg pain since a lifting injury. After a failure of conservative care, a lumbar laminectomy was performed on 2/17/03. But the patient's pain persists.

Requested Service(s)

Purchase of RS4i sequential stimulator 4-channel combination interferential & muscle stimulator unit

Decision

I agree with the carrier's decision to deny the requested treatment.

Rationale

The records provided for this review contained inadequate documentation of the efficacy of the patient's trial with the unit. The Progress Report showed modest improvement, at best, but it was insufficient to justify continuing with this modality.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
