An independent review of the above-referenced case has been completed by a chiropractic doctor. The appropriateness of setting and medical necessity of proposed or rendered services is determined by the application of medical screening criteria published by \_\_\_\_, or by the application of medical screening criteria and protocols formally established by practicing physicians. All available clinical information, the medical necessity guidelines and the special circumstances of said case was considered in making the determination.

The independent review determination and reasons for the determination, including the clinical basis for the determination, is as follows:

See Attached Physician Determination

\_\_\_ hereby certifies that the reviewing physician is on Texas Workers' Compensation Commission Approved Doctor List (ADL). Additionally, said physician has certified that no known conflicts of interest exist between him and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for determination prior to referral to \_\_\_.

#### CLINICAL HISTORY

DOI \_\_\_\_. Patient was struck in the head, right shoulder, neck, back, and rib area. This resulted in a fracture of the first rib. Despite 15 separate medical consultations and active care, the patient still reports pain.

#### REQUESTED SERVICE (S)

Purchase of interferential muscle stimulator

#### DECISION

Approve purchase of interferential muscle stimulator.

#### RATIONALE/BASIS FOR DECISION

Patient was allowed to use this unit from 2/17/03 until 3/31/03. Upon evaluation after use of the device, he reported a decrease in muscle spasm, increase in range of motion, decrease in sleep disturbance, decrease in pain, and decrease in amount of pain medication taken. Clinically this represents progress with the patient's condition. Interferential has an analgesic effect when used in the 90-100 Hz range. Interferential current is also helpful in reducing muscle spasm.
