\_\_\_ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to \_\_\_ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

\_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed Medical Doctor with a specialty and board certification in Occupational Medicine. The \_\_\_ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to \_\_\_ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

#### CLINICAL HISTORY

\_\_\_ injured his neck and right shoulder on \_\_\_ with direct trauma. Subsequent evaluations by MRI and CT-myelogram demonstrated a C6/7 disc herniation. On January 6, 2003 he underwent a C6/7 cervical discectomy and fusion. This patient began using a RS-4i stimulator approximately January 30, 2003. Follow-up visits state "some discomfort in neck (April 16, 2003)" and "His neck is doing well (July 16, 2003)."

#### REQUESTED SERVICE

The purchase of an interferential muscle stimulator is requested for this patient.

#### DECISION

The reviewer agrees with the prior adverse determination.

#### BASIS FOR THE DECISION

A review of the relevant medical literature found no evidence to support the use of neuromuscular stimulation in the treatment of chronic neck pain. No objective evidence for this specific case is provided to demonstrate increased function or decreased medication consumption. Although a

short course of neuromuscular stimulation may be of benefit in the post-operative cervical patient, the long-term use of a neuromuscular stimulator for this patient is not considered to be medically necessary.

\_\_\_ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. \_\_\_ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of \_\_\_, I certify that there is no known conflict between the reviewer, \_\_\_ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

\_\_\_ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,
