___ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to ___ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed Doctor of Osteopathy with a specialty in Pain Management and board certification in Anesthesiology. The reviewer is on the TWCC Approved Doctor List (ADL). The ___ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

CLINICAL HISTORY

___ suffered a low back injury as a result of a lifting incident while unloading pallets from a trailer truck on ___. He went on to have lumbar surgery and now appears to suffer from painful failed back syndrome. In addition to interventional injection therapy, this patient has participated in a substantial pain management program, yet continues to have substantial complaints of debilitating pain. ___ has suggested that the patient undergo a trial intrathecal narcotic delivery system for his continuing pain issues.

REQUESTED SERVICE

The placement of an opiate pump and catheter is requested for this patient.

DECISION

The reviewer agrees with the prior adverse determination.

BASIS FOR THE DECISION

After review of the materials provided, the reviewer finds no substantial detailed information regarding the specific types of p.o. analgesics, their dose ranges and dosing schedules, specific periods of time they were employed, and the results of those trials. It is not uncommon to have suggestions regarding trial of intrathecal narcotic delivery systems when patients have not had

full and adequate trials on p.o. analgesics combined with adjunctive therapy. Without specific details regarding such trials and global failure of all such measures, it is not at all reasonable to consider an intrathecal delivery system trial for this patient.

___ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. ___ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of ___, I certify that there is no known conflict between the reviewer, ___ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

___ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,
