

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

September 19, 2003

Re: IRO Case # M2-03-1752

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Orthopedic Surgery, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 33-year-old female who has had low back pain since a ___ injury. The records provided for this review are incomplete, but numerous diagnoses have been suggested. Injections were recommended. No documentation was provided of completion of those injections. The patient reported 50% pain relief with use of the RS4 stimulator. The notes provided mention decreased medication use, but do not note specific information.

Requested Service(s)

Purchase of RS4i sequential stimulator 4 channel combination

Decision

I agree with the carrier's decision to deny the requested purchase at this time.

Rationale

There is some documentation of the efficacy of the stimulator, including 50% pain relief and an

increase in activities of daily living. But it is unclear from the documentation provided whether additional procedures or medications are planned. Before purchase of the RS4 is considered there should be a longer trial of an additional three months, and documentation showing that use of the RS4 eliminates the need for injections, medications and office visits.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
