

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

October 28, 2003

Re: IRO Case # M2-03-1795

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Neurological Surgery, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 35-year-old female who in ___ was cleaning a bathtub while kneeling when she developed back pain. The patient received chiropractic, medications, physical therapy with rehabilitation, injections in her back and a psychological evaluation without significant benefit. MRIs of the thoracic and lumbar spine were performed on 1/10/03. The thoracic region was thought to be normal, and only small disk changes at the L5-S1 level in the lumbar region were present, and they were not thought to be surgically significant.

Requested Service(s)

Chronic pain management program x 30 sessions

Decision

I agree with the carrier's decision to deny the requested treatment.

Rationale

An extensive pain management program would assume that there would not be an organic source of the patient's discomfort that could be treated. Before a chronic pain management program is considered, a complete work up by a spinal surgery specialist to search for the origin of the patient's pain is necessary. Based on the records provided for review the patient has not yet had such a work up.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
