

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

November 3, 2003

Re: IRO Case # M2-04-0028-01

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Neurological Surgery, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 37-year-old female who in ___ caught her foot in a door, and twisted and fell. She developed knee, low back and neck pain. Right knee surgery was performed in April 2001. Her neck pain persisted and a C4-7 anterior cervical discectomy and corpectomy was performed in May 2002. The patient's back pain has become a major complaint. MRIs on 7/10/02 and 4/3/03 are reported as normal except for some degenerative change, which could be expected.

Requested Service(s)

Epidural pain block injection w/neurolysis

Decision

I agree with the carrier's decision to deny the requested treatment.

Rationale

Nothing was shown on MRI on 7/10/02 or 4/11/03 to show a specific area of difficulty that could be causing the patient's pain. In addition there are no neurologic findings in a specific area. A "shotgun" approach to problems of the spine is rarely helpful in their treatment.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
