Re: MDR #: M2-04-0142-01
IRO Certificate No.: 5055

In accordance with the requirement for TWCC to randomly assign cases to IROs, TWCC assigned your case to ___ for an independent review. ___ has performed an independent review of the medical records to determine medical necessity. In performing this review, ___ reviewed relevant medical records, any documents provided by the parties referenced above, and any documentation and written information submitted in support of the dispute.

The independent review was performed by a matched peer with the treating health care provider. Your case was reviewed by a physician who is Board Certified in Orthopedics.

Clinical History:

This 57-year-old lady developed work-related carpal tunnel on ___. She had carpal tunnel releases done, but, apparently, has continued to have pain. Reference is made in the records to another surgery having been done, but there is no record in the notes of another surgery.

Disputed Services:

MRI of the wrists.

Decision:

The reviewer agrees with the determination of the insurance carrier and is of the opinion that MRI of the wrists is not medically necessary in this case.

Rationale:

The diagnostic test of choice to study carpal tunnel, or the progression of carpal tunnel, is an EMG. The reviewer agrees with a note in the records dated 09/25/03, "Standardization for diagnosis with MRI scan has not been accomplished for carpal tunnel. EMG remains the gold standard for the diagnosis of carpal tunnel."

I am the Secretary and General Counsel of ___ and I certify that the reviewing physician in this case has certified to our organization that there are no known conflicts of interest that exist between him and any of the treating physicians or other health care providers or any of the physicians or other health care providers who reviewed this care for determination prior to referral to the Independent Review Organization.

We are simultaneously forwarding copies of this report to the payor and the Texas Workers' Compensation Commission. This decision by ___ is deemed to be a Commission decision and order.
