Re: MDR #: M2-04-0155-01
IRO Certificate No.: 5055

In accordance with the requirement for TWCC to randomly assign cases to IROs, TWCC assigned your case to ___ for an independent review. ___ has performed an independent review of the medical records to determine medical necessity. In performing this review, ___ reviewed relevant medical records, any documents provided by the parties referenced above, and any documentation and written information submitted in support of the dispute.

The independent review was performed by a matched peer with the treating health care provider. Your case was reviewed by a physician who is Board Certified in Orthopedic Surgery.

Clinical History:

This female claimant is being treated for chondromalacia patellae resulting from a work-related accident on ____. The patient has apparently had knee surgery in the past, but no record of the procedure was found except an MRI where there are changes of lateral meniscectomy. She is being treated conservatively at this time.

Disputed Services:

RS4i interferential muscle stimulator.

Decision:

The reviewer agrees with the determination of the insurance carrier and is of the opinion that the equipment in question is not medically necessary in this case.

Rationale:

Literature, as well as the experience of the reviewer, indicates that active exercises have proven to be more valuable than passive electrical stimulation for rehabilitation.

I am the Secretary and General Counsel of ___ and I certify that the reviewing physician in this case has certified to our organization that there are no known conflicts of interest that exist between him and any of the treating physicians or other health care providers or any of the physicians or other health care providers who reviewed this care for determination prior to referral to the Independent Review Organization.

We are simultaneously forwarding copies of this report to the payor and the Texas Workers' Compensation Commission. This decision by ___ is deemed to be a Commission decision and order.
