

## NOTICE OF INDEPENDENT REVIEW DECISION

November 20, 2003

RE: MDR Tracking #: M2-04-0173-01-SS  
IRO Certificate #: IRO4326

\_\_\_ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to \_\_\_ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

\_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a \_\_\_ physician reviewer who is board certified in neurosurgery which is the same specialty as the treating physician. The \_\_\_ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to \_\_\_ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

### Clinical History

This patient sustained a low back injury on \_\_\_ while attempting to hold back a rack of products from getting loose. He has undergone numerous spine surgeries, the latest being on 01/10/03. He still reports aching and numbness right hip, leg, and foot.

### Requested Service(s)

Right lumbar laminectomy at L3-4 and L4-5

### Decision

It is determined that the proposed right lumbar laminectomy at L3-4 and L4-5 is medically necessary to treat this patient's condition.

### Rationale/Basis for Decision

This patient has actually gone through four spine surgeries, 07/13/02, 07/29/02, 01/09/03, and 01/10/03. In spite of the complex spine history, persistent neurological deficits, and complicating co-existent medical conditions, the proposed operative intervention is

medically appropriate. Therefore, it is determined that the proposed right lumbar laminectomy at L3-4 and L4-5 is medically necessary.

This decision by the IRO is deemed to be a TWCC decision and order.

### **YOUR RIGHT TO REQUEST A HEARING**

Either party to this medical dispute may disagree with all or part of the decision and has a right to request a hearing.
