

**THIS DECISION HAS BEEN APPEALED. THE  
FOLLOWING IS THE RELATED SOAH DECISION NUMBER:**

**SOAH DOCKET NO. 453-04-2216.M2**

November 24, 2003

**NOTICE OF INDEPENDENT REVIEW DECISION**

**RE: MDR Tracking #: M2-04-0336-01**

\_\_\_ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The \_\_\_ IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to \_\_\_ for independent review in accordance with this Rule.

\_\_\_ has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the \_\_\_ external review panel. The reviewer has met the requirements for the ADL of TWCC or has been approved as an exception to the ADL requirement. This physician is board certified in neurosurgery. The \_\_\_ physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to \_\_\_ for independent review. In addition, the \_\_\_ physician reviewer certified that the review was performed without bias for or against any party in this case.

Clinical History

This case concerns a 34 year-old female who sustained a work related injury on \_\_\_. The patient reported that while at work she slipped and fell. The patient underwent an MRI scan on 5/12/03 that showed L4-5 and L5-S1 desiccation and central disc bulging, mainly at L5-S1, with some facet joint arthritis. The patient has been treated with physical therapy, lumbar steroid injections and oral pain medications.

Requested Services

Lumbar Myelogram with CT scan.

Decision

The Carrier's denial of authorization for the requested services is upheld.

Rationale/Basis for Decision

The \_\_\_ physician reviewer noted that this case concerns a 34 year-old female who sustained a work related injury to her back on \_\_\_. The \_\_\_ physician reviewer also noted that the patient underwent an MRI on 5/12/03 that indicated L4-L5 and L5-S1 desiccation and central disc bulging with facet arthritis. The \_\_\_ physician reviewer further noted that the treatment for this

patient's condition has included physical therapy, lumbar steroid injections and oral pain medications. The \_\_\_ physician reviewer explained that there is no evidence of radiculopathy or radicular complaints in this patient's condition. The \_\_\_ physician reviewer also explained that there is no role for CT myelography in the evaluation of this patient.

Therefore, the \_\_\_ physician consultant concluded that the requested lumbar myelogram with CT scan is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
