

**IRO Certificate #4599**

**NOTICE OF INDEPENDENT REVIEW DECISION**

November 20, 2003

**Re: IRO Case # M2-04-0341**

Texas Worker's Compensation Commission:

\_\_\_ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to \_\_\_ for an independent review. \_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, \_\_\_ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to \_\_\_ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the \_\_\_ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 41-year-old female who was injured when she fell on the floor in \_\_\_\_\_. She has had back and left wrist pain, and she underwent surgery to the left wrist in March 2003. The pain persists. There are significant psychosocial factors present that are contributing to her pain experience.

Requested Service(s)

Chronic pain management program x 30 sessions

Decision

I agree with the carrier's decision to deny the requested treatment.

Rationale

There are social issues present, including family problems, recent separation, domestic violence and incarceration. These issues are not related to the injury, but they are a large part of the reason that the patient has been unable to resume normal activities. In addition, the first line of treatment for depression is oral antidepressant therapy. The records provided for this review do not indicate that antidepressant therapy has been administered.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
