___ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to ___ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed Doctor of Osteopathy with a specialty and board certification in Neurological Surgery. The reviewer is on the TWCC Approved Doctor List (ADL). The ___ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

CLINICAL HISTORY

___ is a 49-year-old Spanish-speaking woman who fell at work and was injured on ___. She suffered injuries to her neck, mid and low back. She also complained of pain radiating into her arms and legs. She underwent epidural steroid injections, reported as no improvement times two. She underwent facet blocks at multiple levels bilaterally, again with mixed results, with her pain level going from an 8 to a 6, and then increasing again. An MRI demonstrated multiple level discogenic disease with a small central disc herniation.

REQUESTED SERVICE

A lumbar discogram with CT scan is requested for this patient.

DECISION

The reviewer agrees with the prior adverse determination.

BASIS FOR THE DECISION

There is a request for a lumbar discogram to determine the potential candidate for an intradiscal procedure such as percutaneous discectomy, or lumbar disc decompression procedure such as nucleoplasty. The ___ reviewer finds that this should be denied, as there is insufficient determination that discography is going to benefit this patient in any way whatsoever.

She has had no improvement with epidurals, which is usually discogenic pain. Even with the facet blocks she had some temporary improvement, and then that failed. That a procedure on her discs is going to provide her with any benefit is very suspect here. Unfortunately, discography is not going to provide any useful data for her to determine any future surgical intervention.

___ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. ___ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of ___, I certify that there is no known conflict between the reviewer, ___ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

___ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,

YOUR RIGHT TO REQUEST A HEARING

Either party to medical dispute may disagree with all or part of the decision and has a right to request a hearing.
