NOTICE OF INDEPENDENT REVIEW DECISION

RE: MDR Tracking #: M2-04-0402-01

___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The ___ IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to ___ for independent review in accordance with this Rule.

___ has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the ___ external review panel. The reviewer has met the requirements for the ADL of TWCC or has been approved as an exception to the ADL requirement. This physician is board certified in neurology. The ___ physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to ___ for independent review. In addition, the ___ physician reviewer certified that the review was performed without bias for or against any party in this case.

Clinical History

This case concerns a 54 year-old male who sustained a work related injury on ___. The patient reported that while at work he repeatedly used a high-pressure pneumatic impact gun. The patient indicated that because of the continued jarring of the gun, it has caused injury to his cervical spine. The patient has undergone an MRI of the cervical spine that was reported to have shown herniated disc at the C5-C6 level in 1999. The patient has also been reported to have undergone a fusion surgery at the C5-C6 level. In February of 2001 the patient underwent a fusion surgery at the L4-L5 level. The current diagnoses for this patient include cervicalgia and spasm of muscle. Treatment for this patient has included physical therapy, hot packs and oral medications. The patient has also been prescribed an RS4i Stimulator for home therapy use.

Requested Services

Purchase of Muscle Stimulator.

Decision

The Carrier's denial of authorization for the requested services is upheld.

Rationale/Basis for Decision

The ___ physician reviewer noted that this case concerns a 54 year-old male who sustained a work related injury to his cervical spine on ___. The ___ physician reviewer also noted that the diagnoses for this patient have included cervicalgia and spasm of muscle. The ___ physician reviewer further noted that treatment for this patient's condition has included physical therapy, hot packs and oral medications.

The ___ physician reviewer explained that there is no evidence in controlled studies that long term use of a neuromuscular stimulator is beneficial in resolving chronic pain. The ___ physician reviewer also explained that there is no evidence of decreased analgesic use in this particular case to suggest that the neuromuscular stimulator is benefiting this patient. Therefore, the ___ physician consultant concluded that the requested purchase of a muscle stimulator is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
