NOTICE OF INDEPENDENT REVIEW DECISION

RE: MDR Tracking #: M2-04-0408-01

___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The ___ IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to ___ for independent review in accordance with this Rule.

___ has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the ___ external review panel. The reviewer has met the requirements for the ADL of TWCC or has been approved as an exception to the ADL requirement. This physician is board certified in neurosurgery. The ___ physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to ___ for independent review. In addition, the ___ physician reviewer certified that the review was performed without bias for or against any party in this case.

Clinical History

This case concerns a 58 year-old male who sustained a work related injury on ___. The patient reported that while at work he sustained a low back injury. The patient underwent an MRI dated 2/26/02. A CT scan of the lumbar spine dated 11/11/02 showed disc bulging at the L1-L2, L2-L3 and L3-L4. The patient has been treated with physical therapy, and oral medications and local injections. The patient also underwent a dorsal column stimulator placement on 1/28/02 that was later removed. The patient underwent an intervertebral fusion, posterior laminectomy and PIFL procedure. A psychological evaluation was performed on 9/16/02. An EMG/NCV dated 5/23/03 showed bilateral chronic L5-S1 radiculopathy. The patient's current diagnosis is lumbar displacement, persistent low back pain status post lumbar laminectomy and fusion and fixation, bilateral L5-S1 radiculopathy and peripheral neuropathy.

Requested Services

Outpatient lumbar CT scan with sagittal reconstruction.

Decision

The Carrier's denial of authorization for the requested services is upheld.

Rationale/Basis for Decision

The ___ physician reviewer noted that this case concerns a 58 year-old male who sustained a work related injury to his back on ___. The ___ physician reviewer also noted that the current diagnoses for this patient include lumbar displacement, persistent low back pain status post lumbar laminectomy and fusion and fixation, bilateral L5-S1 radiculopathy and peripheral

neuropathy. The ___ physician reviewer explained that there is no clear indication for CT scan of the lumbar spine determinable from the medical records provided. Therefore, the ___ physician consultant concluded that the requested outpatient lumbar CT scan with sagittal reconstruction is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
