

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

December 19, 2003

Re: IRO Case # M2-04-0436

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Neurological Surgery, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 59-year-old female who slipped and injured her back in _____. Spondylolisthesis was discovered on x-ray, and the patient has a history of a fusion in that area about 17 years ago. Lack of response to conservative measures including epidural steroid injections and physical therapy led to a decompressive laminectomy and re-fusion of the lumbar spine at the L5-S1 level on 8/7/02. Before this operation both CT discography and MRI suggested the possibility of surgically correctable pathology. The patient continues with discomfort.

Requested Service(s)

NCV of four nerves

Decision

I agree with the carrier's decision to deny the requested studies.

Rationale

The patient primarily has back pain of a probable mechanical nature, and what can be accomplished by the results of the proposed tests in regard to further therapy is difficult to determine, and certainly was not outlined in the request or in the records submitted for this review. No therapeutic approach has been suggested to be accomplished secondary to the results of the proposed studies.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.

YOUR RIGHT TO REQUEST A HEARING

Either party to medical dispute may disagree with all or part of the decision and has a right to request a hearing.
