

NOTICE OF INDEPENDENT REVIEW DETERMINATION

MDR Tracking Number: M2-04-0582-01
IRO Certificate No.: 5259

December 31, 2003

An independent review of the above-referenced case has been completed by a chiropractic doctor. The appropriateness of setting and medical necessity of proposed or rendered services is determined by the application of medical screening criteria published by ____, or by the application of medical screening criteria and protocols formally established by practicing physicians. All available clinical information, the medical necessity guidelines and the special circumstances of said case was considered in making the determination.

The independent review determination and reasons for the determination, including the clinical basis for the determination, is as follows:

See Attached Physician Determination

___ hereby certifies that the reviewing physician is on Texas Workers' Compensation Commission Approved Doctor List (ADL). Additionally, said physician has certified that no known conflicts of interest exist between him and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for determination prior to referral to ___.

CLINICAL HISTORY

Patient was injured at work on ___ when she slipped and fell on her left arm and buttocks. Patient had surgical repair to her left lower extremity and received physical medicine treatments.

REQUESTED SERVICE (S)

Prospective medical necessity of the proposed chronic pain management program X 30 sessions.

DECISION

Denied.

RATIONALE/BASIS FOR DECISION

A chronic pain management program is not medically indicated until such time as all other indicated therapies have been attempted and failed. In this case, designated doctor ___ opines that the patient is not MMI and states, "I would recommend more vigorous investigation and her attending physicians may want to even consider some surgical intervention." More importantly, the treating physician supplied no documentation whatsoever that spinal manipulation had been performed at any time.

According to the AHCPR¹ guidelines, spinal manipulation is the only treatment that can relieve symptoms, increase function and hasten recovery for adults with acute low back pain. Based on those findings, a chronic pain management program is not recommended until such time as a proper regimen of this recommended form of treatment had been attempted.

YOUR RIGHT TO REQUEST A HEARING

Either party to this medical dispute may disagree with all or part of the decision and has a right to request a hearing.

If disputing a spinal surgery prospective decision a request for a hearing must be in writing, and it must be received by the TWCC Chief Clerk of Proceedings within **10** (ten) calendar days of your receipt of this decision (20 Tex. Admin. Code 142.5©).

If disputing other prospective medical necessity (preauthorization) decisions a request for a hearing must be in writing, and it must be received by the TWCC Chief Clerk of Proceedings within **20** (twenty) calendar days of your receipt of this decision (28 Tex. Admin. Code 148.3).

This decision is deemed received by you 5 (five) days after it was mailed or the date of fax (28 Tex. Admin. Code 102.4(h) or 102.5(d)). A request for a hearing and a **copy of this decision** must be sent to:

Chief Clerk of Proceedings/Appeals Clerk
Texas Workers' Compensation Commission
P.O. Box 17787
Austin, Texas 78744

Or fax the request to (512) 804-4011. A copy of this decision must be attached to the request.

The party appealing the decision shall deliver a copy of its written request for a hearing to the opposing party involved in the dispute.

In accordance with Commission Rule 102.4(h), I hereby verify that a copy of this Independent Review Organization (IRO) Decision was sent to the carrier, the requestor and claimant via facsimile or U.S. Postal Service from the office of the IRO on this 31st day of December 2003.
