

## NOTICE OF INDEPENDENT REVIEW DETERMINATION

MDR Tracking Number: M2-04-0612-01  
IRO Certificate Number: 5259

January 15, 2004

An independent review of the above-referenced case has been completed by a medical physician board certified in physical medicine and rehabilitation. The appropriateness of setting and medical necessity of proposed or rendered services is determined by the application of medical screening criteria published by \_\_\_\_, or by the application of medical screening criteria and protocols formally established by practicing physicians. All available clinical information, the medical necessity guidelines and the special circumstances of said case was considered in making the determination.

The independent review determination and reasons for the determination, including the clinical basis for the determination, is as follows:

See Attached Physician Determination

\_\_\_ hereby certifies that the reviewing physician is on Texas Workers' Compensation Commission Approved Doctor List (ADL). Additionally, said physician has certified that no known conflicts of interest exist between him and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for determination prior to referral to \_\_\_.

### CLINICAL HISTORY

100 pages of records reviewed regarding a 29-year-old male who lifted a 40 lb. bag at work on \_\_\_ and was found to have lumbar strain/sprain. X-rays of lumbar and thoracic spine revealed no fracture. MRI in June 2002 revealed minimal DDD. No canal compromise. Physical exam negative for thoracic radicular complaints.

### REQUESTED SERVICE(S)

Thoracic epidural steroid injection.

### DECISION

Deny – uphold prior denial.

### RATIONALE/BASIS FOR DECISION

Axial back pain without radicular component is not a justifiable indication for epidural steroid injection. Rationale according to North American Spine Society and numerous peer reviewed, controlled and uncontrolled studies.
