

NOTICE OF INDEPENDENT REVIEW DECISION

February 20, 2004

MDR Tracking #: M2-04-0642-01
IRO Certificate #: IRO4326

The ___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to ___ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a ___ physician reviewer who is board certified in anesthesiology and pain management which is the same specialty as the treating physician. The ___ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This patient sustained an injury on ___ while transferring a patient. She fell with the patient landing on her and reported pain to her low back and left lower extremity. She has failed conservative therapy so far and her physician is requesting a lumbar discogram.

Requested Service(s)

Lumbar discogram

Decision

It is determined that the proposed lumbar discogram is not medically necessary to treat this patient's condition.

Rationale/Basis for Decision

The documentation provided is lacking in enough clinical information for this procedure to be approved. The information lacks documentation of physical therapy with exercise in addition to modalities, psychological status and significant positive factors to indicate that the patient would improve. Therefore, it is determined that the proposed lumbar discogram is not medically necessary.

This decision by the IRO is deemed to be a TWCC decision and order.
