## NOTICE OF INDEPENDENT REVIEW DECISION

### MDR Tracking #: M2-04-0671-01

\_\_\_ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The \_\_\_ IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to \_\_\_ for independent review in accordance with this Rule.

\_\_\_ has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the \_\_\_ external review panel. The reviewer has met the requirements for the ADL of TWCC or has been approved as an exception to the ADL requirement. This physician is board certified in neurology. The \_\_\_ physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to \_\_\_ for independent review. In addition, the \_\_\_ physician reviewer certified that the review was performed without bias for or against any party in this case.

#### Clinical History

This case concerns a 43 year-old female who sustained a work related injury on \_\_\_. The patient reported that while at work she was hit in the shoulder by a ball. The diagnoses for this patient have included right shoulder joint pain, reflex sympathetic dystrophy, myalgia and myositis. Treatment for this patient's condition has included a multidisciplinary pain management program, physical therapy, oral medications and an RS4i sequential stimulator.

#### Requested Services

Purchase of an RS4i sequential stimulator (4 channel combination interferential & muscle stimulator unit)

#### Decision

The Carrier's denial of authorization for the requested services is upheld.

#### Rationale/Basis for Decision

The \_\_\_ physician reviewer noted that this case concerns a 43 year-old female who sustained a work related injury to her shoulder on \_\_\_. The \_\_\_ physician reviewer also noted that the diagnoses for this patient have included right shoulder joint pain, reflex sympathetic dystrophy, myalgia and myositis. The \_\_\_ physician reviewer further noted that treatment for this patient's condition has included multidisciplinary pain management program, physical therapy, oral medications and an RS4i Sequential Stimulator. The \_\_\_ physician reviewer explained that there is no peer reviewed evidence that chronic use of a neuromuscular stimulator improves chronic pain. The \_\_\_ physician reviewer also noted that the documentation provided does not include any objective evidence that this patient's condition has improved with the use of a neuromuscular stimulator.

Therefore, the \_\_\_ physician consultant concluded that the requested purchase of a RS4i Sequential Stimulator is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
