\_\_\_ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to \_\_\_ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

\_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed Medical Doctor with a specialty and board certification in Physical Medicine and Rehabilitation. The reviewer is on the TWCC Approved Doctor List (ADL). The \_\_\_ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to \_\_\_ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

CLINICAL HISTORY

On \_\_\_, \_\_\_ developed low back pain after doing some heavy lifting. He underwent a diagnostic work-up which was inconclusive. His pain became chronic and refractory to all kinds of treatment, including acupuncture and epidural steroid injections. Surgical intervention was offered and declined. He recently underwent lumbar intraspinal injections and reported improvement. His treating doctor has found trigger point tenderness and has recommended Botox chemodenervation injections for treatment of myofascial pain. The patient remains on Vicodin taken several times a day.

REQUESTED SERVICE

ASC for Botox injections (x8) with EMG guidance is requested for this patient.

DECISION

The reviewer agrees with the prior adverse determination.

BASIS FOR THE DECISION

The use of Botox for nonspecific chronic low back pain (designated by myofascial pain or any number of other hypothetical diagnoses) has not been demonstrated to be consistently effective by randomized, blinded controlled studies published in peer-reviewed medical journals. It should be considered an unproven treatment requiring further investigation before acceptance as standard practice. The requested botox injections with EMG guidance do not appear appropriate and medically necessary for this patient.

\_\_\_ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. \_\_\_ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of \_\_\_, I certify that there is no known conflict between the reviewer, \_\_\_ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

\_\_\_ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,
