REQUESTED SERVICE

The purchase of an RS-4i interferential and muscle stimulator is requested for this patient.

DECISION

The reviewer agrees with the prior adverse determination.

BASIS FOR THE DECISION

A review of the relevant medical literature found no evidence to support the use of neuromuscular stimulation in the long-term treatment of shoulder pain. The records provided do not support the use of electrical stimulation for the treatment of this undescribed injury. Therefore, the long-term use of a neuromuscular stimulator for this patient is not considered medically necessary.

___ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. ___ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of ___, I certify that there is no known conflict between the reviewer, ___ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.
