

## NOTICE OF INDEPENDENT REVIEW DECISION

February 25, 2004

MDR Tracking #: M2-04-0778-01-SS  
IRO Certificate #: IRO4326

The \_\_\_ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to \_\_\_ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

\_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a \_\_\_ physician reviewer who is board certified in orthopedic surgery which is the same specialty as the treating physician. The \_\_\_ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to \_\_\_ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

### Clinical History

This patient sustained an injury while in his patrol car on \_\_\_ when he was rear-ended by a truck. He reported pain to his neck and left shoulder with numbness and weakness in the left upper extremity. He has failed conservative trials of physical therapy, facet and nerve root injections, and medications.

### Requested Service(s)

Anterior cervical discectomy with fusion at C4-5, C5-6, and C6-7

### Decision

It is determined that the proposed anterior cervical discectomy with fusion at C4-5, C5-6, and C6-7 is medically necessary to treat this patient's condition.

### Rationale/Basis for Decision

This patient has been extensively evaluated and by more than one spine surgeon with a consistent conclusion of "discogenic pain". The discogram and MRI were positive and his symptoms were relieved by Marcaine injections at multiple levels. Non-operative treatment has failed to adequately relieve his symptoms.

This patient also has a past history of lumbar fusion suggesting congenitally abnormal intervertebral disks leading to early degeneration. The patient has returned to work; however, he is still symptomatic. The motor vehicle accident most likely worsened a pre-existent condition. Therefore, it is determined that the proposed anterior cervical discectomy with fusion at C4-5, C5-6, and C6-7 is medically necessary.

This decision by the IRO is deemed to be a TWCC decision and order.

### **YOUR RIGHT TO REQUEST A HEARING**

Either party to this medical dispute may disagree with all or part of the decision and has a right to request a hearing.

**If disputing a spinal surgery prospective decision** a request for a hearing must be in writing and it must be received by the TWCC Chief Clerk of Proceedings within **10** (ten) calendar days of your receipt of this decision (28 Tex. Admin. Code 142.5 (c))
