

## NOTICE OF INDEPENDENT REVIEW DETERMINATION

MDR Tracking Number: M2-04-0898-01

March 18, 2004  
IRO Certificate# 5259

An independent review of the above-referenced case has been completed by a chiropractic doctor. The appropriateness of setting and medical necessity of proposed or rendered services is determined by the application of medical screening criteria published by \_\_\_ or by the application of medical screening criteria and protocols formally established by practicing physicians. All available clinical information, the medical necessity guidelines and the special circumstances of said case was considered in making the determination.

The independent review determination and reasons for the determination, including the clinical basis for the determination, is as follows:

See Attached Physician Determination

\_\_\_ hereby certifies that the reviewing physician is on Texas Workers' Compensation Commission Approved Doctor List (ADL). Additionally, said physician has certified that no known conflicts of interest exist between him and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for determination prior to referral to \_\_\_.

### CLINICAL HISTORY

After injuring cervical and lumbar spines while lifting a soda machine on \_\_\_, the patient had physical medicine treatments, spinal manipulation and epidural injections.

### REQUESTED SERVICE (S)

Lumbar laminectomy at L5, Right

### DECISION

Approved.

### RATIONALE/BASIS FOR DECISION

The medical records clearly document the medical necessity of the proposed spinal surgery. In fact, the treating doctor repeatedly documented in his records that the patient was a surgical candidate with the first such notation appearing as far back as 12/06/02. According to the AHCPR<sup>1</sup> Guidelines, spinal manipulation is the only treatment that can relieve symptoms, increase function and hasten recovery for adults with acute low back pain. Since the patient failed to respond to exhaustive conservative care that included spinal manipulation and since
