\_\_\_ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to \_\_\_ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

\_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed X board certified and specialized in X. The reviewer is on the TWCC Approved Doctor List (ADL). The \_\_\_ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to \_\_\_ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

#### CLINICAL HISTORY

While walking on a floor that was recently waxed, this patient slipped and fell, causing midback, low back and neck injuries. She was treated with extensive conservative care in the form of chiropractic treatment with modalities and active therapy. Eventually there was treatment rendered utilizing ESI therapy. Lumbar MRI revealed a mild diffuse bulging and a small subluxation of L4 on L5, but otherwise normal. Records of the treating doctor indicate that early in the treatment program the patient was noted as having a pain level of 6/10 on a visual analog scale. About 4 months later the pain was reported on several dates as being 10/10.

#### REQUESTED SERVICE

The carrier has denied the preauthorization for the purchase of a Smart Wave Galvanic Stimulator.

## DECISION

The reviewer agrees with the prior adverse determination.

### BASIS FOR THE DECISION

This patient is unlikely to benefit from the requested therapy. As a matter of principle, she should be receiving active care at this point in time and there is no indication that there is any physical barrier to such treatment. However, there is indication of a possible functional overlay on this case, in that we are seeing instances in the fall of 2003 where the patient despite several months of what seems to be good care, was proclaiming pain at the level of 10/10 when it had earlier been only a 6/10. The reviewer feels that galvanic therapy is not an appropriate method of treatment for this case and finds the purchase of this equipment neither reasonable nor necessary.

\_\_\_ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. \_\_\_ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of \_\_\_, I certify that there is no known conflict between the reviewer, \_\_\_ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

\_\_\_ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,
