

NOTICE OF INDEPENDENT REVIEW DECISION

April 1, 2004

MDR Tracking #: M2-04-0943-01
IRO Certificate #: IRO4326

The ___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to ___ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a ___ physician reviewer who is board certified in family practice which is the same specialty as the treating physician. The ___ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This patient sustained a back injury on ___ mechanism unknown. She underwent a lumbar fusion at L5-S1 in 02/2001. She now is diagnosed with failed back surgery syndrome and has had facet and epidural steroid injections with little relief.

Requested Service(s)

The purchase of RS4i sequential 4-channel combination interferential and muscle stimulator

Decision

It is determined that the purchase of RS4i sequential 4-channel combination interferential and muscle stimulator is not medically necessary for this patient treatment.

Rationale/Basis for Decision

Data is available to indicate the muscle stimulator is primarily short term treatment. This patient needs daily active exercises, medications as needed, and intermittent therapy. There is no clear documentation that an electrical stimulator of this type is needed. Therefore, it is determined that the purchase of RS4i sequential 4-channel combination interferential and muscle stimulator is not medically necessary for this patient treatment.

This decision by the IRO is deemed to be a TWCC decision and order.
