IRO Certificate # 5259

April 5, 2004

An independent review of the above-referenced case has been completed by a chiropractic doctor. The appropriateness of setting and medical necessity of proposed or rendered services is determined by the application of medical screening criteria published by ___ or by the application of medical screening criteria and protocols formally established by practicing physicians. All available clinical information, the medical necessity guidelines and the special circumstances of said case was considered in making the determination.

The independent review determination and reasons for the determination, including the clinical basis for the determination, is as follows:

See Attached Physician Determination

___ hereby certifies that the reviewing physician is on Texas Workers' Compensation Commission Approved Doctor List (ADL). Additionally, said physician has certified that no known conflicts of interest exist between him and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for determination prior to referral to ___.

CLINICAL HISTORY

Patient received spinal injuries after an on-the-job motor vehicle accident on ___.

REQUESTED SERVICE (S)

Work hardening program x 6 weeks

DECISION

Approved.

RATIONALE/BASIS FOR DECISION

The carrier's reviewer denied medical necessity on the basis of the age of the injury, no history of surgery and no MRI diagnostic studies. None of those reasons, individually or collectively, have any validity in determining the medical necessity of the work hardening program in question. The history, examination and treatment records fully document that the work hardening program is medically necessary since it will likely promote recovery and enhance the ability of the employee to return to or retain employment.

That opinion is supported by designated doctor ___ who on 01/13/04 opined, "He would benefit from an FCE-directed work-conditioning program..."
