

NOTICE OF INDEPENDENT REVIEW DECISION

May 14, 2004

MDR Tracking #: M2-04-0972-01-SS
IRO Certificate #: IRO4326

The ___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to ___ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a ___ physician reviewer who is board certified in Neurological Surgery, by the ___, licensed by the ___ in ___ and who provides health care to injured workers. This is the same specialty as the treating physician. The ___ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This 48 year old male was injured when struck by a piece of machinery in the face and was thrown fifteen feet on ___. The patient has been treated with anti-inflammatory and muscle relaxing medications and steroid injections.

Requested Service(s)

Anterior cervical diskectomy fusion

Decision

It is determined that the anterior cervical diskectomy fusion is medically necessary.

Rationale/Basis for Decision

This patient has symptoms consistent with and physical findings supporting cervical radiculopathy. The radiographic study (MRI) shows principal abnormalities at C5-6 and C6-7. The symptoms have not responded to the appropriate conservative care of greater than two years duration. Therefore, the surgery as proposed is indicated and medically necessary.

This decision by the IRO is deemed to be a TWCC decision and order.
