

**IRO Certificate #4599**

**NOTICE OF INDEPENDENT REVIEW DECISION**

April 2, 2004

**Re: IRO Case # M2-04-0987**

Texas Worker's Compensation Commission:

\_\_\_ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to \_\_\_ for an independent review. \_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, \_\_\_ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to \_\_\_ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the \_\_\_ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 52-year-old male who has had chronic lower back pain since a December \_\_\_ injury. On 9/23/03 he underwent a bilateral lumbar laminectomy at L5-S1, without significant benefit. The patient has been receiving treatment from a chiropractor and has been prescribed medications.

Requested Service(s)

Purchase of Inferential Muscle Stimulator

Decision

I agree with the carrier's decision to deny the proposed purchase.

Rationale

Notes provided for this review suggest that use of the RS4 may be helping the patient, but in the physician's progress notes provided for this review there is no indication that medications have been decreased. In addition, the usage log indicates infrequent use of the RS4 stimulator. Therefore, it is not reasonable and necessary to continue this modality.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
