

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

April 2, 2004

Re: IRO Case # M2-04-1007

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 61-year-old male who has had chronic low back pain since ___ when he was injured while lifting boxes. The patient has been treated with physical therapy, work hardening, injections and psychotherapy.

Requested Service(s)

Chronic behavioral pain management program x 20 sessions

Decision

I agree with the carrier's decision to deny the proposed pain management program.

Rationale

Before considering a behavioral pain management program, an aggressive oral antidepressant regimen should be implemented. Based on the records provided for this review, it appears that the patient has not yet been treated with such an antidepressant regimen. This should be accomplished first, prior to a pain management program. In addition, the patient has received extensive therapy with little objective evidence of pathology. Psychotherapy has been provided. There is no reason to continue similar modalities when little or no improvement has occurred to date, nearly five years post injury.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
