IRO Certificate # 5259

April 12, 2004

An independent review of the above-referenced case has been completed by a medical physician board certified in family practice. The appropriateness of setting and medical necessity of proposed or rendered services is determined by the application of medical screening criteria published by ____, or by the application of medical screening criteria and protocols formally established by practicing physicians. All available clinical information, the medical necessity guidelines and the special circumstances of said case was considered in making the determination.

The independent review determination and reasons for the determination, including the clinical basis for the determination, is as follows:

See Attached Physician Determination

___ hereby certifies that the reviewing physician is on Texas Workers' Compensation Commission Approved Doctor List (ADL). Additionally, said physician has certified that no known conflicts of interest exist between him and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for determination prior to referral to ___.

CLINICAL HISTORY

___ had a work related back injury on ____. He was treated with medications, physical therapy, muscle stimulator and surgery. A request to purchase an interferential stimulator is dated 11/24/03.

REQUESTED SERVICE (S)

Purchase of an Interferential Muscle Stimulator

DECISION

Denied.

RATIONALE/BASIS FOR DECISION

This device is typically used as an adjunctive treatment in the acute phase of treatment. This view is supported by standard of care, generally accepted guidelines, and peer-review literature such as the Philadelphia Panel Study, CMS, and NASS. In addition, no objective evidence was submitted to verify decrease use of services or medications, compliance, or improvement in function or job status in this particular case related to the muscle stimulator. Therefore, the prior denial is upheld.
