

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

May 27, 2004

Re: IRO Case # M2-04-1077

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Neurological Surgery, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

Medical Information Reviewed

1. Table of disputed services
2. Denial letters 2/26/04, 2/3/04
3. Surgeon's notes 5/2003 – 1/2004
4. Report lumbar myelogram and CT scan 5/16/03
5. NRI lumbar spine report 3/30/01

History

The patient is a 58-year-old female who in ___ was injured and developed back pain. This led to a fusion from L4 through S1. Despite that fusion, she has had intermittent problems with back pain that were not relieved by epidural steroid injections.

Recently the back pain has become more severe, and is associated with lower extremity discomfort, primarily on the left side in the hip and leg region.

Requested Service(s)

Lumbar MRI repeat

Decision

I disagree with the carrier's decision to deny the requested MRI.

Rationale

Chronic pain after an L4-S1 fusion that is described as solid suggests that something at an adjacent joint may be present. There was no explanation for this on CT myelographic evaluation one year ago. A repeat MRI of the lumbar spine may well show changes above the fusion, especially since sufficient time has passed for changes associated with fusion at adjacent levels to develop. These changes may be present and significant in regard to pain production without new neurological findings on physical examination.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
