REVISED REPORT
Corrected date of injury in "Clinical History"

Re: MDR #: M2-04-1128-01
IRO Certificate No.: 5055

In accordance with the requirement for TWCC to randomly assign cases to IROs, TWCC assigned your case to ___ for an independent review. ___ has performed an independent review of the medical records to determine medical necessity. In performing this review, ___ reviewed relevant medical records, any documents provided by the parties referenced above, and any documentation and written information submitted in support of the dispute.

I am Secretary and General Counsel of ___ and I certify that the reviewing physician in this case has certified to our organization that there are no known conflicts of interest that exist between him and any of the treating physicians or other health care providers or any of the physicians or other health care providers who reviewed this care for determination prior to referral to the Independent Review Organization.

Information and medical records pertinent to this medical dispute were requested from the Requestor and every named provider of care, as well as from the Respondent. The independent review was performed by a matched peer with the treating health care provider. Your case was reviewed by a physician who is certified in the area of Physical Medicine/Rehabilitation, and is currently listed on the TWCC Approved Doctor List.

REVIEWER'S REPORT

Information Provided for Review:

Correspondence
History & physical exam

Clinical History:

This patient was injured on ____. She had a left rotator cuff repair, subacromial decompression, and distal clavicular resection arthroscopically on 12/30/03. Following that, she started physical therapy with passive range of motion exercises and pendulum exercises.

Disputed Services:

Purchase of a muscle stimulator

Decision:

The reviewer agrees with the determination of the insurance carrier and is of the opinion that purchase of a muscle stimulator is not medically necessary in this case.

Rationale:

The doctor's letter of 1/26/04 clearly states that the patient was able to decrease the use of medication and had increased functional capacity due to reduction of pain with the use of the stimulator. The patient's pain scale went from a rating of 7-8 down to a 2-3-pain level.

However, according to the notes provided, the patient has not yet started undergoing active physical therapy for appropriate rehabilitation after the left shoulder surgery as described above. Consequently, at this point in time, it is reasonable to deny purchase of a muscle stimulating unit RS4i.

We are simultaneously forwarding copies of this report to the payor and the Texas Workers' Compensation Commission. This decision by ____ is deemed to be a Commission decision and order.
